For health care professionals

NO COST-SHARE PREVENTIVE MEDICATIONS

by drug category

The Patient Protection and Affordable Care Act (PPACA), commonly referred to as "health care reform," was signed into law on March 23, 2010. This important legislation will result in changes to current health coverage including coverage of preventive health care services and certain medications with **no out-of-pocket cost** to individuals.

Health care reform requires coverage of specific preventive medications with no patient cost-sharing

The following products and prescription medications (as well as specific over-the-counter medications) may be available to your patients with no cost-sharing (copay, coinsurance or deductible) depending upon the terms of their plan.

Patients should review their plan materials or visit **myCigna.com** for details about how these products and medications may be covered under their Cigna administered plan.

Please note: A prescription is required to process any claim for preventive care medications or products under a patient's Cigna administered pharmacy plan, including over-the-counter medications.
