Specialty health care includes behavioral, dental, disease and medical management, stop-loss, and pharmacy-related products and services.

Results also benefited from attractive medical cost trend, aided by our continued focus on clinical quality, as well as sustained contributions from our specialty products.
- Premiums and fees in the fourth quarter 2010 increased approximately 20% relative to fourth quarter 2009, primarily due to net membership growth and a change in membership mix to reflect a higher percentage of commercial and Medicare related risk businesses. Excluding the Medicare Advantage Individual Private Fee for Service business, fourth quarter premiums and fees increased approximately 14% relative to fourth quarter 2009.
- Fourth quarter 2010 adjusted segment earnings reflect favorable in year claim development of approximately \$42 million after-tax related to lower-than-expected utilization, partially offset by increased operating expenses related to investments to support business growth, compliance costs and market segment expansion opportunities.
- Health Care medical claims payable<sup>6</sup> increased to approximately \$1.0 billion at December 31, 2010 from \$715 million at December 31, 2009, primarily due to membership growth in our commercial and Medicare related risk businesses.

### OUTLOOK

- CIGNA estimates full year 2011 consolidated adjusted income from operations<sup>1,3</sup> to be in the range of \$1.19 billion to \$1.29 billion, or \$4.30 to \$4.70 per share. This outlook reflects continued solid execution of our growth strategy, the expected impact of current health reform regulations and some acceleration of medical services utilization during 2011.
- CIGNA's earnings and earnings per share outlooks exclude the impact of any stock repurchase<sup>8</sup> subsequent to the date of this release.
- CIGNA estimates full year 2011 medical membership growth to be in the range of 0% to +3%, excluding membership losses from exits of non-strategic markets including the Medicare Advantage Individual Private Fee for Service business.
- CIGNA's earnings and earnings per share outlooks assume break-even results for VADBe<sup>2</sup> for full year 2011, which assumes that actual experience, including capital market performance, will be consistent with long term reserve assumptions. See the Critical Accounting Estimates section of the Management's Discussion and Analysis of the Company's Form 10-K for more information on the effect of capital market assumption changes in shareholders' net income.
- Management will provide additional information about the 2011 earnings outlook on CIGNA's fourth quarter 2010 earnings call.

The foregoing statements represent management's current estimate of CIGNA's 2011 consolidated and segment adjusted income from operations<sup>1,3</sup> as of the date of this release. Actual results may differ materially depending on a number of factors, and investors are urged to read the Cautionary Statement included in this release for a description of those factors. Management does not assume any obligation to update these estimates.

#### Notes:

1. CIGNA measures the financial results of its segments using Segment Earnings (Loss), which is defined as shareholders' income (loss) from continuing operations before net realized investment results. Adjusted income (loss) from operations is defined as segment earnings excluding special items (which are identified and quantified in Note 5) and excludes results of CIGNA's GMIB<sup>2</sup> business. Adjusted income (loss) from operations is a measure of profitability used by CIGNA's management because it presents the underlying results of operations of CIGNA's businesses and permits analysis of trends in underlying revenue, expenses and shareholders' net income. This measure is not determined in accordance with generally accepted accounting principles (GAAP) and should not be viewed as a substitute for the most directly comparable GAAP measures, which are segment earnings (loss), shareholders' income from continuing operations, and shareholders' net income. See Exhibit 2 for a reconciliation of adjusted income (loss) from operations to segment earnings (loss), shareholders' income from continuing operations, and consolidated shareholders' net income.
2. The Guaranteed Minimum Income Benefits (GMIB) business and Guaranteed Minimum Death Benefits business, also known as Variable Annuity Death Benefits (VADBe), are included in our Run-off Reinsurance operations. These businesses have been in run-off since 2000.
3. Information is not available for management to (1) reasonably estimate future net realized investment gains (losses) or (2) reasonably estimate future GMIB<sup>2</sup> business results due in part to interest rate and stock market volatility and other internal and external factors; therefore it is not possible to provide a forward-looking reconciliation of adjusted income from operations to shareholders' income from continuing operations. Special items for 2011 may include potential adjustments associated with cost reduction, litigation, tax and assessment related items. Information is not available for management to identify, other than these items, or reasonably estimate additional 2011 special items.
4. The application of the FASB's fair value disclosure and measurement guidance (ASC 820-10), which impacts reinsurance contracts covering GMIB<sup>2</sup>, does not represent management's expectation of the ultimate payout. Changes in underlying contract holder account values, interest rates, stock market volatility, and other factors may result in changes to the fair value assumptions, and/or amount that will be required to ultimately settle the Company's obligations, which could result in a material adverse or favorable impact on the Run-off Reinsurance segment and CIGNA's results of operations.
5. Special items included in shareholders' net income and segment earnings (loss), but excluded from adjusted income (loss) from operations, adjusted segment earnings, and the calculation of segment margins include:

#### Fourth Quarter 2010 and Year ended December 31, 2010

- After-tax benefit of \$101 million related to completion of an IRS examination and the after-tax charges of \$39 million related to the early extinguishment of debt and \$20 million related to the transfer of the workers compensation and personal accident businesses that are included in our Run-off Reinsurance operations.

#### Fourth Quarter 2009

- After-tax charge of \$13 million related to CIGNA's previously announced cost reduction plan.

6. **Health Care medical claims payable are presented net of reinsurance and other recoverables. The gross Health Care medical claims payable balance was \$1.2 billion as of December 31, 2010 and \$921 million as of December 31, 2009.**
7. **Segment margins in this press release are calculated by dividing adjusted segment earnings by segment revenues. For the three months ended December 31, 2009, segment margins including special items were 5.6% for Health Care, 8.7% for Disability and Life and 7.3% for International.**
8. **Repurchases may from time to time be made pursuant to written trading plans under Rule 10b5-1, which permit shares to be repurchased when CIGNA might otherwise be precluded from doing so under insider trading laws or because of self-employed trading blackout periods.**

**CAUTIONARY STATEMENT FOR PURPOSES OF THE “SAFE HARBOR” PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995**

CIGNA Corporation and its subsidiaries (the “Company”) and its representatives may from time to time make written and oral forward-looking statements, including statements contained in press releases, in the Company’s filings with the Securities and Exchange Commission, in its reports to shareholders and in meetings with analysts and investors. Forward-looking statements may contain information about financial prospects, economic conditions, trends and other uncertainties. These forward-looking statements are based on management’s beliefs and assumptions and on information available to management at the time the statements are or were made. Forward-looking statements include but are not limited to the information concerning possible or assumed future business strategies, financing plans, competitive position, potential growth opportunities, potential operating performance improvements, trends and, in particular, the Company’s strategic initiatives, litigation and other legal matters, operational improvement initiatives in the health care operations, and the outlook for the Company’s full year 2011 and beyond results. Forward-looking statements include all statements that are not historical facts and can be identified by the use of forward-looking terminology such as the words “believe”, “expect”, “plan”, “intend”, “anticipate”, “estimate”, “predict”, “potential”, “may”, “should” or similar expressions.

By their nature, forward-looking statements: (i) speak only as of the date they are made, (ii) are not guarantees of future performance or results and (iii) are subject to risks, uncertainties and assumptions that are difficult to predict or quantify. Therefore, actual results could differ materially and adversely from those forward-looking statements as a result of a variety of factors. Some factors that could cause actual results to differ materially from the forward-looking statements include:

1. increased medical costs that are higher than anticipated in establishing premium rates in the Company’s Health Care operations, including increased use and costs of medical services;
2. increased medical, administrative, technology or other costs resulting from new legislative and regulatory requirements imposed on the Company’s businesses;
3. challenges and risks associated with implementing operational improvement initiatives and strategic actions in the ongoing operations of the businesses, including those related to: (i) growth in targeted geographies, product lines, buying segments and distribution channels, (ii) offering products that meet emerging market needs, (iii) strengthening underwriting and pricing effectiveness, (iv) strengthening medical cost and medical membership results, (v) delivering quality member and provider service using effective technology solutions, (vi) lowering administrative costs and (vii) transitioning to an integrated operating company model, including operating efficiencies related to the transition;
4. risks associated with pending and potential state and federal class action lawsuits, disputes regarding reinsurance arrangements, other litigation and regulatory actions challenging the Company’s businesses, including disputes related to payments to health care professionals, government investigations and proceedings, and tax audits and related litigation;
5. heightened competition, particularly price competition, which could reduce product margins and constrain growth in the Company’s businesses, primarily the Health Care business;
6. risks associated with the Company’s mail order pharmacy business which, among other things, includes any potential operational deficiencies or service issues as well as loss or suspension of state pharmacy licenses;
7. significant changes in interest rates or sustained deterioration in the commercial real estate markets;
8. downgrades in the financial strength ratings of the Company’s insurance subsidiaries, which could, among other things, adversely affect new sales, retention of current business as well as a downgrade in financial strength ratings of reinsurers which could result in increased statutory reserve or capital requirements;
9. limitations on the ability of the Company’s insurance subsidiaries to dividend capital to the parent company as a result of

- downgrades in the subsidiaries' financial strength ratings, changes in statutory reserve or capital requirements or other financial constraints;
10. inability of the program adopted by the Company to substantially reduce equity market risks for reinsurance contracts that guarantee minimum death benefits under certain variable annuities (including possible market difficulties in entering into appropriate futures contracts and in matching such contracts to the underlying equity risk);
  11. adjustments to the reserve assumptions (including lapse, partial surrender, mortality, interest rates and volatility) used in estimating the Company's liabilities for reinsurance contracts covering guaranteed minimum death benefits under certain variable annuities;
  12. adjustments to the assumptions (including annuity election rates and amounts collectible from reinsurers) used in estimating the Company's assets and liabilities for reinsurance contracts covering guaranteed minimum income benefits under certain variable annuities;
  13. significant stock market declines, which could, among other things, result in increased expenses for guaranteed minimum income benefit contracts, guaranteed minimum death benefit contracts and the Company's pension plans in future periods as well as the recognition of additional pension obligations;
  14. significant deterioration in economic conditions and significant market volatility, which could have an adverse effect on the Company's operations, investments, liquidity and access to capital markets;
  15. significant deterioration in economic conditions and significant market volatility, which could have an adverse effect on the businesses of our customers (including the amount and type of health care services provided to their workforce, loss in workforce and our customers' ability to pay receivables) and our vendors (including their ability to provide services);
  16. adverse changes in state, federal and international laws and regulations, including health care reform legislation and regulation which could, among other items, affect the way the Company does business, increase cost, limit the ability to effectively estimate, price for and manage medical costs, and affect the Company's products, services, market segments, technology and processes;
  17. amendments to income tax laws, which could affect the taxation of employer provided benefits, the taxation of certain insurance products such as corporate-owned life insurance, or the financial decisions of individuals whose variable annuities are covered under reinsurance contracts issued by the Company;
  18. potential public health epidemics, pandemics and bio-terrorist activity, which could, among other things, cause the Company's covered medical and disability expenses, pharmacy costs and mortality experience to rise significantly, and cause operational disruption, depending on the severity of the event and number of individuals affected;
  19. risks associated with security or interruption of information systems, which could, among other things, cause operational disruption;
  20. challenges and risks associated with the successful management of the Company's outsourcing projects or key vendors, including the agreement with IBM for provision of technology infrastructure and related services;
  21. the ability to successfully complete the integration of acquired businesses; and
  22. the unique political, legal, operational, regulatory and other challenges associated with expanding our business globally.

This list of important factors is not intended to be exhaustive. Other sections of the Company's most recent Annual Report on Form 10-K, including the "Risk Factors" section, the Quarterly Reports on Form 10-Q for the quarters ended March 31, 2010, June 30, 2010 and September 30, 2010, and other documents filed with the Securities and Exchange Commission include both expanded discussion of these factors and additional risk factors and uncertainties that could preclude the Company from realizing the forward-looking statements. The Company does not assume any obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.
