# Intensive Behavioral Therapy (IBT) for Obesity

### DISCLAIMER

This booklet was current at the time it was published or uploaded onto the web. Medicare policy changes frequently so links to the source documents have been provided within the document for your reference.

This booklet was prepared as a service to the public and is not intended to grant rights or impose obligations. This booklet may contain references or links to statutes, regulations, or other policy materials. The information provided is only intended to be a general summary. It is not intended to take the place of either the written law or regulations. We encourage readers to review the specific statutes, regulations, and other interpretive materials for a full and accurate statement of their contents.

### ICD-9-CM Notice

The International Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM) is published by the United States Government. A CD-ROM, which may be purchased through the Government Printing Office, is the only official Federal government version of the ICD-9-CM. ICD-9-CM is an official Health Insurance Portability and Accountability Act standard.

### NUBC Disclaimer

The American Hospital Association (the “AHA”) has not reviewed, and is not responsible for, the completeness or accuracy of any information contained in this material, nor was the AHA or any of its affiliates, involved in the preparation of this material, or the analysis of information provided in the material. The views and/or positions presented in the material do not necessarily represent the views of the AHA. CMS and its products and services are not endorsed by the AHA or any of its affiliates.

### Medicare Learning Network® (MLN)

The Medicare Learning Network® (MLN), a registered trademark of CMS, is the brand name for official CMS educational products and information for Medicare Fee-For-Service Providers. For additional information, visit the MLN’s web page at <http://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNGenInfo> on the CMS website.

Your feedback is important to us and we use your suggestions to help us improve our educational products, services and activities and to develop products, services and activities that better meet your educational needs. To evaluate Medicare Learning Network® (MLN) products, services and activities you have participated in, received, or downloaded, please go to <http://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNProducts> and click on the link called ‘MLN Opinion Page’ in the left-hand menu and follow the instructions.

Please send your suggestions related to MLN product topics or formats to [MLN@cms.hhs.gov](mailto:MLN@cms.hhs.gov).

The Centers for Medicare & Medicaid Services (CMS) recognizes the crucial role that health care providers play in educating Medicare beneficiaries about potentially life-saving preventive services and screenings, and in providing these services. While Medicare pays for a variety of preventive benefits, many Medicare beneficiaries do not fully realize that using preventive services and screenings can help them live longer, healthier lives. As a health care professional, you can help your Medicare patients understand the importance of disease prevention, early detection, and lifestyle modifications that support a healthier life. This booklet can help you communicate with your patients about Medicare-covered Intensive Behavioral Therapy (IBT) for obesity, as well as assist you in correctly billing for these services.

## Overview

The Centers for Disease Control and Prevention (CDC) reported that obesity rates in the U.S. increased dramatically over the last 30 years, and obesity is now an epidemic in the U.S. In the Medicare population, over 30 percent of men and women are obese. Obesity is directly or indirectly associated with many chronic diseases, including:

- ▶ Cardiovascular disease,
- ▶ Musculoskeletal conditions, and
- ▶ Diabetes.

### Removal of Barriers to Preventive Services Under the Affordable Care Act

Medicare waives the coinsurance or copayment and deductible for those Medicare-covered preventive services recommended by the United States Preventive Services Task Force (USPSTF) with a grade of A or B for any indication or population, and that are appropriate for the individual.

The Affordable Care Act authorizes CMS to add coverage of “additional preventive services” through the National Coverage Determination (NCD) process. For CMS to add a preventive service, it must be:

- ▶ Reasonable and necessary for the prevention or early detection of an illness or disability;
- ▶ Recommended with a grade of A or B by the USPSTF; and
- ▶ Appropriate for individuals entitled to benefits under Part A or enrolled under Part B of the Medicare Program.

## Coverage Information

Effective with dates of service on or after November 29, 2011, Medicare covers IBT for obesity, defined as a body mass index (BMI) of 30 kilograms per meter squared, for the prevention or early detection of illness or disability. IBT for obesity consists of the following:

- ▶ Screening for obesity in adults using measurement of BMI, which is calculated by dividing weight in kilograms by the square height in meters;
- ▶ Dietary (nutritional) assessment; and
- ▶ Intensive behavioral counseling and behavioral therapy to promote sustained weight loss through high intensity interventions on diet and exercise.

Medicare provides coverage of IBT for obesity (BMI  $\geq$  30 kilograms per meter squared) for Medicare beneficiaries:

- ▶ Who are competent and alert at the time that counseling is provided; and
- ▶ Whose counseling is furnished by a qualified primary care physician or other primary care practitioner and in a primary care setting.

### Stand Alone Benefit

The IBT for obesity benefit covered by Medicare is a stand alone billable service. It is separate from the Initial Preventive Physical Examination (IPPE) or the Annual Wellness Visit (AWV). Medicare beneficiaries may obtain IBT for obesity services at any time following Medicare Part B enrollment, including during their IPPE or AWV encounter.

Each IBT for obesity must be consistent with the 5A's approach adopted by the USPSTF. This approach includes:

1. **Assess:** Ask about or assess behavioral health risk(s) and factors affecting choice of behavior change goals or methods;
2. **Advise:** Give clear, specific, and personalized behavior change advice, including information about personal health harms and benefits;
3. **Agree:** Collaboratively select appropriate treatment goals and methods based on the beneficiary's interest in and willingness to change the behavior;
4. **Assist:** Using behavior change techniques (self-help and/or counseling), aid the beneficiary in achieving agreed-upon goals by acquiring the skills, confidence, and social or environmental supports for behavior change, supplemented with adjunctive medical treatments when appropriate; and
5. **Arrange:** Schedule follow-up contacts (in person or by telephone) to provide ongoing assistance or support and to adjust the treatment plan as needed, including referral to more intensive or specialized treatment.

## Primary Care Setting Defined

For the purpose of this benefit, a primary care setting is defined as one in which there is a provision of integrated, accessible health care services by clinicians who are accountable for addressing a large majority of personal health care needs, developing a sustained partnership with patients, and practicing in the context of family and community. The following are not considered primary care settings under this definition:

- ▶ Ambulatory surgical centers,
- ▶ Emergency departments,
- ▶ Hospices,
- ▶ Independent diagnostic testing facilities,
- ▶ Inpatient hospital settings,
- ▶ Inpatient rehabilitation facilities, and
- ▶ Skilled nursing facilities.

Medicare covers IBT for obesity provided in:

- ▶ An independent clinic,
- ▶ An outpatient hospital,
- ▶ A physician's office, or
- ▶ A state or local public health clinic.

## Frequency

Medicare covers a maximum of 22 IBT for obesity sessions in a 12-month period.

Medicare beneficiaries who meet the previously mentioned criteria are eligible for:

- ▶ One face-to-face visit every week for the first month;
- ▶ One face-to-face visit every other week for months 2 – 6; and
- ▶ One face-to-face visit every month for months 7 – 12, if the beneficiary meets the 3 kg (6.6 pounds) weight loss requirement during the first 6 months.

### Who Are Primary Care Physicians and Practitioners?

For the purpose of the IBT for obesity benefit:

#### Primary Care Physician

A physician who has a primary specialty designation of:

- ▶ Family practice,
- ▶ General practice,
- ▶ Geriatric medicine,
- ▶ Internal medicine,
- ▶ Obstetrics/gynecology, or
- ▶ Pediatric medicine.

#### Primary Care Practitioner

A qualified non-physician practitioner is a:

- ▶ Certified clinical nurse specialist,
- ▶ Nurse practitioner, or
- ▶ Physician assistant.

Primary care physicians' and practitioners' corresponding specialty codes apply when billing professional claims. When billing institutional claims, follow billing instructions based on your facility type.

**NOTE:** In addition, Medicare may cover behavioral counseling for obesity services when billed by one of the provider specialty types listed above and furnished by auxiliary personnel under the conditions specified under our regulation at 42 Code of Federal Regulations (CFR) Section 410.26(b) (conditions for services and supplies incident to a physician's professional service) or 42 CFR Section 410.27 (conditions for outpatient hospital services and supplies incident to a physician service).

At the 6-month visit, a reassessment of obesity and a determination of the amount of weight loss must be performed. To be eligible for additional face-to-face visits occurring once a month for an additional 6 months, beneficiaries must have achieved a reduction in weight of at least 3 kg (6.6 pounds) over the course of the first 6 months of intensive therapy. This determination must be documented in the physician office records for applicable beneficiaries consistent with usual practice. For beneficiaries who do not achieve a weight loss of at least 3 kg (6.6 pounds) during the first 6 months of intensive therapy, a reassessment of their readiness to change and BMI is appropriate after an additional 6-month period.

**EXAMPLE:** A beneficiary gets the first IBT for obesity session in January 2012 and gets all 22 sessions. The count starts February 2012. The beneficiary may get another first IBT for obesity session in January 2013.

### Coinsurance or Copayment and Deductible

The beneficiary pays nothing (no coinsurance or copayment and no Medicare Part B deductible) for IBT for obesity. Financial responsibilities may apply for the beneficiary if the provider does not accept assignment.

## Documentation

Medical records must document all coverage requirements, including the determination of weight loss at the 6-month visit.

## Coding and Diagnosis Information

### Procedure Codes and Descriptors

Use the following Healthcare Common Procedure Coding System (HCPCS) code, listed in Table 1, to report IBT for obesity.

**Table 1. HCPCS Code for IBT for Obesity**

HCPCS Code	Code Descriptor
G0447	Face-to-face behavioral counseling for obesity, 15 minutes

### Diagnosis Requirements

You must report one of the following International Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM) screening (“V”) diagnosis code(s), listed in Table 2, for IBT for obesity.

**Coming Soon!**  
**International Classification of Diseases, 10th Revision, Clinical Modification/Procedure Coding System (ICD-10-CM/PCS)**

For more information, visit <http://www.cms.gov/Medicare/Coding/ICD10> on the CMS website.

**Table 2. Diagnosis Codes for IBT for Obesity**

ICD-9-CM Diagnosis Code	Code Descriptor
V85.30	Body Mass Index 30.0 – 30.9, adult
V85.31	Body Mass Index 31.0 – 31.9, adult
V85.32	Body Mass Index 32.0 – 32.9, adult
V85.33	Body Mass Index 33.0 – 33.9, adult
V85.34	Body Mass Index 34.0 – 34.9, adult
V85.35	Body Mass Index 35.0 – 35.9, adult
V85.36	Body Mass Index 36.0 – 36.9, adult
V85.37	Body Mass Index 37.0 – 37.9, adult
V85.38	Body Mass Index 38.0 – 38.9, adult
V85.39	Body Mass Index 39.0 – 39.9, adult
V85.41	Body Mass Index 40.0 – 44.9, adult
V85.42	Body Mass Index 45.0 – 49.9, adult
V85.43	Body Mass Index 50.0 – 59.9, adult
V85.44	Body Mass Index 60.0 – 69.9, adult
V85.45	Body Mass Index 70 and over, adult

## Billing Requirements

### Billing and Coding Requirements When Submitting Professional Claims

When you submit professional claims to carriers or A/B Medicare Administrative Contractors (MACs), report the appropriate HCPCS code and the corresponding ICD-9-CM diagnosis code in the X12 837-P (Professional) electronic claim format. You must also include Place of Service (POS) codes on all professional claims, to indicate where you provided the service. For more information on POS codes, visit <http://www.cms.gov/Medicare/Coding/place-of-service-codes> on the CMS website.

**NOTE:** If you qualify for an exception to the Administrative Simplification Compliance Act (ASCA) requirement, you may use Form CMS-1500 to submit these claims on paper. All providers must use Form CMS-1500, version 08-05, when submitting paper claims. For more information on Form CMS-1500, visit [http://www.cms.gov/Medicare/Billing/ElectronicBillingEDITrans/16\\_1500.html](http://www.cms.gov/Medicare/Billing/ElectronicBillingEDITrans/16_1500.html) on the CMS website.

#### Electronic Claims Requirements

ASCA requires providers to submit claims to Medicare electronically, with limited exceptions. For more information about the electronic formats, visit <http://www.cms.gov/Medicare/Billing/ElectronicBillingEDITrans/HealthCareClaims.html> on the CMS website.

### Billing and Coding Requirements When Submitting Institutional Claims

When you submit institutional claims to Fiscal Intermediaries (FIs) or A/B MACs, report the appropriate HCPCS code, revenue code, and the corresponding ICD-9-CM diagnosis code in the X12 837-I (Institutional) electronic claim format.

**NOTE:** If an institution qualifies for an exception to the ASCA requirement, it may use Form CMS-1450 to submit these claims on paper. All providers must use Form CMS-1450 (UB-04) when submitting paper claims. For more information on Form CMS-1450, visit [http://www.cms.gov/Medicare/Billing/ElectronicBillingEDITrans/15\\_1450.html](http://www.cms.gov/Medicare/Billing/ElectronicBillingEDITrans/15_1450.html) on the CMS website.

## Types of Bill (TOBs) for Institutional Claims

The FI or A/B MAC pays for IBT for obesity when submitted on the following TOBs, listed in Table 3. For further guidance on the appropriate revenue code, contact your local Medicare Contractor.

**Table 3. Facility Types and TOBs for IBT for Obesity**

Facility Type	TOB
Hospital Outpatient	13X
Rural Health Clinic (RHC)	71X
Federally Qualified Health Center (FQHC)	77X
Critical Access Hospital (CAH)	85X

## Additional Billing Instructions for FQHCs and RHCs

The professional component of preventive services is within the scope of covered FQHC or RHC services. The professional component is a physician's interpretation of the results of an examination. For instructions on billing the professional component, visit <http://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNMattersArticles/Downloads/SE1039.pdf> on the CMS website.

The technical component is services rendered outside the scope of the physician's interpretation of the results of an examination. If you perform technical components or services, not within the scope of covered FQHC or RHC services, in association with professional components, how you bill depends on whether the FQHC or RHC is independent or provider-based:

- ▶ **For Provider-Based FQHCs or RHCs:** Bill the technical component of the service on the TOB for the base provider and submit to the FI or A/B MAC in the 837-I format. For more information on billing instructions for provider-based FQHCs or RHCs, visit <http://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Internet-Only-Manuals-IOMs-Items/CMS018912.html> on the CMS website and choose the appropriate chapter based on your facility type.
- ▶ **For Independent FQHCs or RHCs:** Bill the technical component of the service to the carrier or A/B MAC in the 837-P format. For more information on billing instructions for independent FQHCs or RHCs, visit <http://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/clm104c12.pdf> and <http://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/clm104c26.pdf> on the CMS website.

## Payment Information

### Professional Claims

When you bill your carrier or A/B MAC, Medicare pays for IBT for obesity under the Medicare Physician Fee Schedule (MPFS).

**As with other MPFS services, the non-participating provider reduction and limiting charge provisions apply to all IBT for obesity services.**

### Institutional Claims

When you bill your FI or A/B MAC, Medicare payment for IBT for obesity depends on the type of facility providing the service. Table 4 lists the type of payment that facilities get.

**Table 4. Facility Payment Methods for IBT for Obesity**

Facility Type	Basis of Payment
Hospital Outpatient*	Outpatient Prospective Payment System (OPPS)
RHC	All-Inclusive Payment Rate
FQHC	All-Inclusive Payment Rate
CAH	Method I: 101% of reasonable cost for technical component(s) of services Method II: 101% of reasonable cost for technical component(s) of services, plus 115% of MPFS non-facility rate for professional component(s) of services

\* Medicare pays Maryland hospitals for inpatient or outpatient services according to the Maryland State Cost Containment Plan.

## Reasons for Claim Denial

Medicare may deny coverage of IBT for obesity in several situations, including:

- ▶ The beneficiary got more than 22 IBT for obesity sessions in the last 12 months.
- ▶ The beneficiary got IBT for obesity outside of the primary care setting.

### Providers Must Use EFT

All providers enrolling in the Medicare Program for the first time, changing existing enrollment data, or revalidating enrollment must use Electronic Funds Transfer (EFT) to get payments. For more information about EFT, visit <http://www.cms.gov/Medicare/Billing/ElectronicBillingEDITrans/EFT.html> on the CMS website.

### Medicare Contractor Contact Information

For carrier, FI, or A/B MAC contact information, visit <http://www.cms.gov/Research-Statistics-Data-and-Systems/Monitoring-Programs/Provider-Compliance-Interactive-Map> on the CMS website.

You may find specific payment decision information on the Remittance Advice (RA). The RA includes Claim Adjustment Reason Codes (CARCs) and Remittance Advice Remark Codes (RARCs) that provide additional information on payment adjustments. For the most current listing of these codes, visit <http://www.wpc-edi.com/reference> on the Internet. You can obtain additional information about claims from your carrier, FI, or A/B MAC.

**RA Information**

For more information about the RA, visit <http://www.cms.gov/Medicare/Billing/ElectronicBillingEDITrans/Remittance.html> on the CMS website.

**Resources**

For more information about IBT for obesity, refer to the resources listed in Tables 5 and 6. For educational products for Medicare Fee-For-Service health care professionals and their staff, information on coverage, coding, billing, payment, and claim filing procedures, visit <http://www.cms.gov/Outreach-and-Education/Medicare-Learning-Network-MLN/MLNProducts/PreventiveServices.html> on the CMS website, or scan the Quick Response (QR) code to the right with your mobile device.
