Top five tips to improve HEDIS scores

Please use this updated guide to help improve your Healthcare Effectiveness Data and Information Set (HEDIS) scores.

2019 CERVICAL CANCER SCREENING MEASURE
Women age 21–64 who had one or more Pap tests in the past two years; OR, women age 30–64 who had cervical cytology/human papillomavirus (HPV) co-testing every five years. Exclusions include hysterectomy with no residual cervix, cervical agenesis or acquired absence of cervix.

IMPORTANT
Please be sure to use the most recent code during the measurement year to ensure billing accuracy.

TOP FIVE TIPS

Check to make sure you:

☐ Use correct diagnosis and procedure codes and submit claims and encounter data on time.

☐ Encourage Pap screening during regular well visits, sick visits, urine pregnancy test visits and UTI or STD screening visits.
  • Get results of screenings sent to PCP's office if performed during GYN visit.

☐ Document the date and result of a cervical cytology with a note in medical record.

☐ Document a hysterectomy as total, complete or radical if cervix was removed.
