PPACA NO COST-SHARE PREVENTIVE MEDICATIONS

by drug category

At Cigna, your health and well-being is important to us. We want you to live life to the fullest. Taking your preventive medications regularly can help you get – and stay – healthy.

Health care reform requires coverage of certain preventive medications at no cost-share to you

Health care reform under the Patient Protection and Affordable Care Act (PPACA) requires plans to cover certain preventive medications and products at 100%, or no cost-share (\$0) to you.¹ The U.S. Preventive Services Task Force and the Institute of Medicine provide guidance on which drug classes should be covered. These recommendations are meant to help prevent disease, as well as meet women's unique health care needs.

Preventive medication coverage

This document shows the prescription medications and over-the-counter medicines (available without a prescription) and products available to you at no cost-share (copay, coinsurance and/or deductible). This list is updated as the U.S. Preventive Services Task Force makes new recommendations.

You should log into the **myCigna**[®] app or website, or check your plan materials to learn more about how your plan covers preventive medications.

Choosing the right preventive medication

There are many preventive medications covered at 100% (or no cost-share to you) under PPACA's preventive coverage requirement. You should talk with your doctor to find out which medication or product may be right for you. If your doctor feels a certain contraceptive medication or smoking cessation medication on this list isn't right for you, ask your doctor to call us. Together, we'll look for other medications and products not on this list that may be available to you at no cost-share. **Please be sure to get a prescription from your doctor for your preventive medication or over-the-counter product.** Your pharmacy will need a prescription for the medication to process at no cost (\$0) to you.

Together, all the way.[®]

This document shows the prescription medications and over-the-counter medicines and products available to you at no cost-share under PPACA. This list is updated as the U.S. Preventive Services Task Force makes new recommendations.

1. This is a list of the medications and other products covered at 100% under the plan's pharmacy benefit at this time, based on existing legal requirements, and is subject to plan terms like limitations and exclusions. For example, if legal requirements for preventive coverage changes, then this list may change.

Medical insurance policies/service agreements contain exclusions and limitations. To be eligible for coverage, a drug must be approved by the Food and Drug Administration (FDA), prescribed by a health care professional, purchased from a licensed pharmacy and medically necessary. If your policy/service agreement provides coverage for certain prescription drugs with no cost-share, you may be required to use an in-network pharmacy to fill or purchase the prescription. If you use a pharmacy that does not participate in your plan's network, your prescription may not be covered, or reimbursement may be limited by your plan's copayment, coinsurance or deductible requirements. Refer to your plan documents for costs and complete details of your plan's prescription drug coverage.

Cigna reserves the right to make changes to this drug list without notice. Your plan may cover additional medications; please refer to your enrollment materials for details. Cigna does not take responsibility for any medication decisions made by the doctor or pharmacist.
