#### **MHPAEA Summary Form Instructions**

The below summary form is prepared to satisfy the requirements of 15-144 (m)(2), Insurance Article, Annotated Code of Maryland. The summary form must be made available to plan members and to the public on the carrier's website.

Confidential and proprietary information must be removed from the summary form. Confidential and proprietary information that is removed from the summary form must satisfy § 15-144(h)(1), Insurance Article, Annotated Code of Maryland.

The MHPAEA Summary Form includes the MHPAEA Data Report.

Carriers must use the terms defined in COMAR 31.10.51 and the *Instructions for MHPAEA NQTL Analysis Report and Data Report* to complete the summary form.

Preferred Provider Organization (PPO) PPO-OAP1 Open Access Plus- Non CA 500

Under a federal law called the Mental Health Parity and Addiction Equity Act (MHPAEA), [carrier name] must make sure that there is "parity" between mental health and substance use disorder benefits, and medical and surgical benefits. This generally means that financial requirements and treatment limitations applied to mental health or substance use disorder benefits cannot be more restrictive than the financial requirements and treatment limitations applied to medical and surgical benefits. The types of limits covered by parity protections include:

- Financial requirements—such as deductibles, copayments, coinsurance, and out-of-pocket limits; and
- Treatment limitations—such as limits on the number of days or visits covered, or other limits on the scope or duration of treatment (for example, being required to get prior authorization).

Cigna Health & Life Insurance Company has performed an analysis of mental health parity as required by Maryland law and has submitted the required report to the State of Maryland. Below is a summary of that report.

If you have any questions on this summary, please contact Customer Service at 1 (800) 997-1654.

If you have questions on your specific health plan, please call	Behavioral Health Benefits 1 (800) 433-5768 24 hours a day, 365 days a year
	Medical, Dental, Vision

Medical, Dental, Vision 1 (800) 244-6224 24 hours a day, 365 days a year

TTY/TDD Service (For callers who are deaf or hard of hearing) Dial 711 and follow the prompts 24 hours a day, 365 days a year.

#### **Overview:**

We have identified the five health benefit plans with the highest enrollment for each product we offer in the individual, small, and large group markets, as applicable. These plans contain items called Non-Quantitative Treatment Limitations (NQTLs) that put limits on benefits paid. What these NQTL's are and how the health plans achieve parity are discussed below.

# 1. Definition of Medical Necessity

Medical/Surgical Benefits (M/S)	Mental Health/Substance Use Disorder Benefits (MH/SUD)	
Services Subject to Medical Necessity:	Services Subject to Medical Necessity:	
All inpatient and outpatient M/S services, whether in-network or out-of-network must be medically necessary. Services determined by Cigna not to be medically necessary would excluded under the terms of the plan.	All inpatient and outpatient MH/SUD services, whether in- network or out-of-network must be medically necessary. Services determined by Cigna not to be medically necessary would excluded under the terms of the plan.	
Cigna employs the same definition of medical necessity to medical/surgical (M/S) and mental health/substance use disorder (MH/SUD) benefits. Cigna Medical Directors apply the definition of "medical necessity" set forth in the governing plan instrument or the definition required by state law. Notwithstanding the above, Cigna's standard definition of "medical necessity" is as follows:	Cigna employs the same definition of medical necessity to medical/surgical (M/S) and mental health/substance use disorder (MH/SUD) benefits. Cigna Medical Directors apply the definition of "medical necessity" set forth in the governing plan instrument or the definition required by state law. Notwithstanding the above, Cigna's standard definition of "medical necessity" is as follows:	
<b>Medically Necessary/Medical Necessity</b> Health care services, supplies and medications provided for the purpose of preventing, evaluating, diagnosing or treating a Sickness, Injury, condition, disease or its symptoms, that are all of the following as determined by a Medical Director or Review Organization:	Medically Necessary/Medical Necessity Health care services, supplies and medications provided for the purpose of preventing, evaluating, diagnosing or treating a Sickness, Injury, condition, disease or its symptoms, that are all of the following as determined by a Medical Director or Review Organization:	
• required to diagnose or treat an illness, Injury, disease or its symptoms;	• required to diagnose or treat an illness, Injury, disease or its symptoms;	
• in accordance with generally accepted standards of medical practice;	• in accordance with generally accepted standards of medical practice;	
• clinically appropriate in terms of type, frequency, extent, site and duration;	• clinically appropriate in terms of type, frequency, extent, site and duration;	
• not primarily for the convenience of the patient, Physician or other health care provider;	• not primarily for the convenience of the patient, Physician or other health care provider;	
	• not more costly than an alternative service(s), medication(s) or	

<ul> <li>not more costly than an alternative service(s), medication(s) or supply(ies) that is at least as likely to produce equivalent therapeutic or diagnostic results with the same safety profile as to the prevention, evaluation, diagnosis or treatment of your Sickness, Injury, condition, disease or its symptoms; and</li> <li>rendered in the least intensive setting that is appropriate for the delivery of the services, supplies or medications. Where applicable, the Medical Director or Review Organization may compare the cost-effectiveness of alternative services, supplies, medications or settings when determining least intensive setting.</li> </ul>	<ul> <li>supply(ies) that is at least as likely to produce equivalent therapeutic or diagnostic results with the same safety profile as to the prevention, evaluation, diagnosis or treatment of your Sickness, Injury, condition, disease or its symptoms; and</li> <li>rendered in the least intensive setting that is appropriate for the delivery of the services, supplies or medications. 	governing reviews of MH/SUD benefits.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

Cigna's medical necessity coverage policy development and application process is consistent between M/S and MH/SUD. Cigna applies comparable evidence-based guidelines to define established standards of effective care in both M/S and MH/SUD benefits. Consistency in policy development, process and application evidences compliance with the NQTL requirement that the medical management process be applied comparably, and no more stringently, to MH/SUD services than to M/S services. Compliance is further demonstrated through Cigna's uniform definition of Medical Necessity for M/S and MH/SUD benefits.

An "in operation" review of Cigna's application of the medical necessity NQTL, specifically approvals and denials rates, for Prior Authorization, Retrospective Review, and Concurrent Review across benefit classifications for a sampling of Cigna plans revealed no statistically significant discrepancies in medical necessity denial rates as-between MH/SUD and M/S benefits. While operational outcomes are not determinative of NQTL compliance, and a plan may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. Consequently, Cigna concludes that the NQTL was applied comparably and no more stringently to MH/SUD benefits than to M/S benefits. In performing the operational analysis of the application of UM, Cigna reviewed denial rates for both M/S and MH/SUD within each classification of benefits and for benefits subject to prior authorization, concurrent review, and retrospective review.

# 2. Prior Authorization Review Process

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
<ul> <li>Prior Authorization/Pre-Authorized The term Prior Authorization means the approval that a Participating Provider must receive from the Review Organization, prior to services being rendered, in order for certain services and benefits to be covered under this policy. </li> <li>Services that require Prior Authorization include, but are not limited to: <ul> <li>inpatient Hospital services, except for 48/96 hour maternity stays.</li> <li>inpatient services at any participating Other Health Care Facility.</li> <li>residential treatment.</li> <li>outpatient facility services.</li> <li>partial hospitalization.</li> <li>intensive outpatient programs.</li> <li>advanced radiological imaging.</li> <li>non-emergency ambulance.</li> <li>certain Medical Pharmaceuticals.</li> <li>home health care services.</li> <li>radiation therapy.</li> <li>transplant services.</li> </ul> </li> </ul>	<ul> <li>Prior Authorization/Pre-Authorized</li> <li>The term Prior Authorization means the approval that a Participating Provider must receive from the Review Organization, prior to services being rendered, in order for certain services and benefits to be covered under this policy.</li> <li>Services that require Prior Authorization include, but are not limited to: <ul> <li>inpatient Hospital services, except for 48/96 hour maternity stays.</li> <li>inpatient services at any participating Other Health Care Facility.</li> <li>residential treatment.</li> <li>outpatient facility services.</li> <li>partial hospitalization.</li> <li>intensive outpatient programs.</li> <li>advanced radiological imaging.</li> <li>non-emergency ambulance.</li> <li>certain Medical Pharmaceuticals.</li> <li>home health care services.</li> <li>radiation therapy.</li> <li>transplant services.</li> </ul> </li> </ul>

M/S inje	outpatient benefits, with the exception of certain ectable drugs, are subject to fail-first and/or step requirements.	No M/S outpatient benefits, with the exception of certain M/S injectable drugs, are subject to fail-first and/or step therapy requirements.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

Inpatient, In-Network	Cigna applies prior authorization NQTL consistently to M/S benefits and MH/SUD benefits across benefit classifications. For both in-network and out-of-network M/S and MH/SUD benefits, Cigna requires prior authorization of non-emergent inpatient services. In reaching this conclusion, Cigna has assessed several components of its utilization management program for NQTL compliance, including the methodology for determining which services will be subject to utilization management, the process for reviewing utilization management requests, and the process for applying coverage criteria.
	The process by which prior authorization is applied to M/S and MH/SUD inpatient, in-network benefits is comparable and applied no more stringently to MH/SUD inpatient benefits.
	Coverage determinations of both M/S services and MH/SUD services are made in accordance with evidence-based treatment guidelines by physician peer reviewers licensed in the same or similar specialty area as the treating provider. Moreover, Cigna's methodology for determining which MH/SUD services within a classification of benefits are subject to prior authorization is comparable to, and applied no more stringently than, its methodology for determining which medical/surgical services within the same classification of benefits are subject to prior authorization.
	Cigna's methodology for determining which medical/surgical services and which MH/SUD services within a classification of benefits are subject to prior authorization, as written in policy/procedure and in operation, as well as its pre-service medical necessity review processes applied to medical/surgical services and for MH/SUD services as written and in operation, reflect they are comparable and no more stringent for MH/SUD services within a classification of benefits than for medical/surgical services within the same classification of benefits.
	An "in operation" review of Cigna's application of the Prior Authorization NQTL, specifically approvals and denial information, in the In-Patient, In-Network classification for a sampling of plans revealed no statistically significant

	discrepancies in denial rates as-between MH/SUD and M/S benefits. While operational outcomes are not determinative of NQTL compliance, and an insurer may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can have available outcomes are not for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can
	help evidence compliance with the in-operation component of the NQTL requirement. Consequently, Cigna concludes that the NQTL was applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.
Outpatient Office Visits, In- Network	Outpatient, In-Network office visits for M/S and MH/SUD benefits do not require prior authorization.
All Other Outpatient Services, In-Network	Cigna applies the prior authorization NQTL consistently to M/S benefits and MH/SUD benefits. In reaching this conclusion, Cigna has assessed several components of its utilization management program for NQTL compliance, including the methodology for determining which services will be subject to utilization management, the process for reviewing utilization management requests, and the process for applying coverage criteria.
	Coverage determinations of medical/surgical services and MH/SUD services are made in accordance with evidence- based treatment guidelines by physician peer reviewers licensed in the same or similar specialty area as the treating provider. Moreover, Cigna's methodology for determining which MH/SUD services within a classification of benefits are subject to prior authorization is comparable to, and applied no more stringently than, its methodology for determining which medical/surgical services within the same classification of benefits are subject to prior authorization.
	Cigna's methodology for determining which medical/surgical services and which MH/SUD services within a classification of benefits are subject to prior authorization as written and in operation, as well as its pre-service medical necessity review processes applied to medical/surgical services and for MH/SUD services as written and in operation reflect they are comparable and no more stringent for MH/SUD services within a classification of benefits than for medical/surgical services within the same classification of benefits.
	An "in operation" review of Cigna's application of the Prior Authorization NQTL, specifically approvals and denial information, in the Outpatient, In-Network, All Other classification for a sampling of plans revealed no statistically significant discrepancies in denial rates as-between MH/SUD and M/S benefits. While operational outcomes are not determinative of NQTL compliance, and an insurer may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. Consequently, Cigna concludes that the NQTL was applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.

Cigna applies prior authorization NQTL consistently to M/S benefits and MH/SUD benefits across benefit classifications. For both in-network and out-of-network M/S and MH/SUD benefits, Cigna requires prior authorization of non-emergent inpatient services. In reaching this conclusion, Cigna has assessed several components of its utilization management program for NQTL compliance, including the methodology for determining which services will be subject to utilization management, the process for reviewing utilization management requests, and the process for applying coverage criteria.				
Coverage determinations of medical/surgical services and MH/SUD services are made in accordance with evidence based treatment guidelines by physician peer reviewers licensed in the same or similar specialty area as the treating provider. Moreover, Cigna's methodology for determining which MH/SUD services within a classification of bene are subject to prior authorization is comparable to, and applied no more stringently than, its methodology for determining which medical/surgical services within the same classification of benefits are subject to prior authorization.				
Cigna's methodology for determining which medical/surgical services and which MH/SUD services within a classification of benefits are subject to prior authorization, as written in policy/procedure and in operation, as well as its pre-service medical necessity review processes applied to medical/surgical services and for MH/SUD services as written and in operation, reflect they are comparable and no more stringent for MH/SUD services within a classification of benefits than for medical/surgical services within the same classification of benefits.				
An "in operation" review of Cigna's application of the Prior Authorization NQTL, specifically approvals and denial information, in the In-Patient, Out-of-Network classification revealed no statistically significant discrepancies in denial rates as-between MH/SUD and M/S benefits. While operational outcomes are not determinative of NQTL compliance, and an insurer may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. Consequently, Cigna concludes that the NQTL was applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.				
Outpatient, Out-of-Network, Office Visits for M/S and MH/SUD benefits do not require prior authorization. Because				
the prior authorization NQTL does not apply to MH/SUD benefits, no further analysis of compliance with the NQTL				
requirement is warranted.				
requirement to manufacture.				
Cigna applies prior authorization/precertification NQTL consistently to M/S benefits and MH/SUD benefits.				
In both M/S and MH/SUD services, for both in-network and out-of-network M/S and MH/SUD benefits Cigna requires prior-authorization of non-emergent in-patient services, and for some, but not all outpatient services based				

Out-of- Network	upon the same array of factors which include the cost of treatment (i.e. unit cost and trended cost of services); high cost growth (i.e. high utilization relative to benchmark); variability in cost and quality; provider discretion in determining type and length of treatment; clinical efficacy of proposed course of treatment; and claim/treatment types subject to a higher percentage of fraud, waste and/or abuse.
	Coverage determinations of medical/surgical services and MH/SUD services are made in accordance with evidence- based treatment guidelines by physician peer reviewers licensed in the same or similar specialty area as the treating provider. Moreover, Cigna's methodology for determining which MH/SUD services within a classification of benefits are subject to prior authorization is comparable to, and applied no more stringently than, its methodology for determining which medical/surgical services within the same classification of benefits are subject to prior authorization.
Cigna's methodology for determining which medical/surgical services and which MH/SUD services with classification of benefits are subject to prior authorization as written and in operation, as well as its pre-sunecessity review processes applied to medical/surgical services and for MH/SUD services as written and reflect they are comparable and no more stringent for MH/SUD services within a classification of benefit medical/surgical services within the same classification of benefits.	
	An "in operation" review of Cigna's application of the Prior Authorization NQTL, specifically approvals and denial information, in the "Outpatient, Out-of-Network, All Other Items and Services" classification revealed no statistically significant discrepancies in denial rates as-between MH/SUD and M/S benefits. While operational outcomes are not determinative of NQTL compliance, and an insurer may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. Consequently, Cigna concludes that the NQTL was applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.

# 3. <u>Concurrent Review Process</u>

	Medical/Surgical Benefits (M/S)	Mental Health/Substance Use Disorder Benefits (MH/SUD)
	<b>Concurrent Determinations</b> When an ongoing course of treatment has been approved for you and you wish to extend the approval, you or your representative must request a required concurrent coverage determination at least 24 hours prior to the expiration of the approved period of time or number of treatments. When you or your representative requests such a determination, Cigna will notify you or your representative of the determination within 24 hours after receiving the request.	<b>Concurrent Determinations</b> When an ongoing course of treatment has been approved for you and you wish to extend the approval, you or your representative must request a required concurrent coverage determination at least 24 hours prior to the expiration of the approved period of time or number of treatments. No M/S outpatient benefits are subject to fail-first and/or step therapy requirements.	No MH/SUD outpatient benefits are subject to fail-first and/or step therapy requirements.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

Inpatient, In-Network	Cigna applies the concurrent care review NQTL consistently to M/S benefits and MH/SUD benefits. In both M/S and MH/SUD services, concurrent care reviews are typically initiated by a nurse reviewer for M/S benefits or Care Manager (licensed behavioral health clinician) for MH/SUD benefits telephonically a day or two before the last covered/authorized day.	
	An "in operation" review of Cigna's application of the Concurrent Review NQTL, specifically approvals and denial information, in the "Inpatient, In-Network" classification revealed no statistically significant discrepancies in medical necessity denial rates as-between MH/SUD and M/S benefits. While operational outcomes are not determinative of NQTL compliance, and an insurer may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. Consequently, Cigna concludes that the NQTL was applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.	
	A review of concurrent review appeals data reveals comparable upheld and overturn rates and, on average, lower overturn rates for MH/SUD benefits in the out of-network outpatient and inpatient classifications. Specifically, an analysis of the total out-of-network appeal overturn rate as-between inpatient MH/SUD and M/S services includes a 9 percent lower denial rate (about 30% to about 39%) for MH/SUD services concurrent review appeals for Out of Network, Out Patient, and nearly identical appeal overturn rates (about 23% as-compared to about 27%) for MH/SUD and M/S services appeals to a concurrent review determination.	

	Cigna's methodology for determining which medical/surgical services and which MH/SUD services within a classification of benefits are subject to concurrent care review as written and in operation, as well as its concurrent care medical necessity review processes applied to medical/surgical services and for MH/SUD services as written and in operation reflect they are comparable and no more stringent for MH/SUD services within a classification of benefits than for medical/surgical services within the same classification of benefits.
Outpatient Office Visits, In- Network	Outpatient, In-Network, Office Visits for M/S and MH/SUD benefits do not require concurrent review. Because the concurrent review NQTL does not apply to MH/SUD benefits, no further analysis of compliance with the NQTL requirement is warranted.
All Other Outpatient Services, In-Network	Cigna applies the concurrent care review NQTL consistently to M/S benefits and MH/SUD benefits. In both M/S and MH/SUD services, concurrent care reviews are typically initiated by a nurse reviewer for M/S benefits or Care Manager (licensed behavioral health clinician) for MH/SUD benefits telephonically a day or two before the last covered/authorized day.
	Coverage determinations of M/S services and MH/SUD services are made in accordance with evidence-based treatment guidelines by physician peer reviewers licensed in the same or similar specialty area as the treating provider. Moreover, Cigna's methodology for determining which MH/SUD services within a classification of benefits are subject to concurrent care review is comparable to, and applied no more stringently than, its methodology for determining which medical/surgical services within the same classification of benefits are subject to concurrent care review.
	An "in operation" review of Cigna's application of the Concurrent Review NQTL, specifically approvals and denial information, in the "Outpatient, In-Network, Other Items and Services" classification revealed no statistically significant discrepancies in denial rates as-between MH/SUD and M/S benefits. While operational outcomes are not determinative of NQTL compliance, and an insurer may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. Consequently, Cigna concludes that the NQTL was applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.
	A review of concurrent review appeals data reveals comparable upheld and overturn rates and, on average, lower overturn rates for MH/SUD benefits in the out of-network outpatient and inpatient classifications. Specifically, an analysis of the total out-of-network appeal overturn rate as-between inpatient MH/SUD and M/S services includes a 9 percent lower denial rate (about 30% to about 39%) for MH/SUD services concurrent review appeals for Out of Network, Out Patient, and nearly identical appeal overturn rates (about 23% as-compared to about 27%) for MH/SUD and M/S services appeals to a concurrent review determination.

the full internal and/or external appeal process.	the full internal and/or external appeal process.

B. Identify the factors used in the development of the limitation(s);

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
( <b>M/S</b> )	(MH/SUD)
The factors used to determine that retroactive review NQTL will	The factors used to determine that retroactive review NQTL will
apply to M/S benefit is whether the prior authorization of the M/S	apply to MH/SUD benefit is whether the prior
services were obtained via the pre-service or concurrent care	authorization/precertification of the MH/SUD services were
review process and an enrollee has requested such review.	

obtained via the pre-service or concurrent care review process and
an enrollee has requested such review.

C. Identify the sources (including any processes, strategies, or evidentiary standards) used to evaluate the factors identified above;

Medical/Surgical Benefits (M/S)	Mental Health/Substance Use Disorder Benefits (MH/SUD)
Enrollee Medical Records and Plan Documents	Medical Records and Plan Documents
Clinical Criteria/Medical Necessity	Clinical Criteria/Medical Necessity

D. Identify the methods and analysis used in the development of the limitation(s); and

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
In determining whether health care services, supplies, or	In determining whether health care services, supplies, or
medications are Medically Necessary, all elements of Medical	medications are Medically Necessary, all elements of Medical
Necessity must be met as specifically outlined in the individual's	Necessity must be met as specifically outlined in the individual's
benefit plan documents, the Medical Director or Review	benefit plan documents, the Medical Director or Review
Organization may rely on the clinical coverage policies	Organization may rely on the clinical coverage policies
maintained by Cigna or the Review Organization.	maintained by Cigna or the Review Organization.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

Retrospective Medical Necessity Review is a process, strategy or evidentiary standard designed to limit the scope or duration of benefits for services provided under an enrollee benefit plan. Retrospective Medical Necessity Review is available for both M/S and MH/SUD In-Patient, In-Network, Inpatient Out-of-Network, All Other Outpatient In-Network and All Other Outpatient Out-of-Network services upon request of the enrollee *if* prior authorization was not obtained via the pre-service or concurrent care review process.

UM coverage determinations of M/S services and MH/SUD services use the same processes, strategies, and evidentiary standards and are made in accordance with evidence-based treatment guidelines by physician peer reviewers licensed in the same or similar specialty area as the treating provider.

Moreover, Cigna's methodology for determining which MH/SUD services within a classification of benefits are subject to retrospective review is comparable to, and applied no more stringently than, its methodology for determining which medical/surgical services within the same classification of benefits are subject to retrospective review.

An "in operation" book of business review of Cigna's application of the Retrospective Review NQTL, specifically approvals and denial information, in the "Inpatient, In-Network" classification revealed no statistically significant discrepancies in denial rates as-between MH/SUD and M/S benefits. Likewise, the in operation review of Cigna's application of the Retrospective Review NQTL, specifically approvals and denial information, in the "Inpatient, Out-of-Network" classification revealed no statistically significant discrepancies in denial rates as-between MH/SUD and M/S benefits.

An in operation review of Cigna's application of the Retrospective Review NQTL, specifically approvals and denial information, in the "Outpatient In-Network" and Outpatient Out-of-Network classifications revealed higher denial rates for M/S benefits than for MH/SUD benefits across all determinations including coverage denial, denied as not medical necessary and denied as experimental, investigational or unproven.

When reviewing the average number of days approved upon retrospective review for inpatient services, the approval times were nearly identical with 7 days approved for MH/SUD services and 7.2 days approved for M/S services.

Lastly, a review of Level 1 appeals data revealed near identical rates of appeals denial, determinations upheld with MH/SUD reflecting 77.22% upheld and M/S reflecting 74.68% for Inpatient, In-Network, 79.32% and 85.70% respectively for Inpatient Out-of-Network; 63.16% and 72.29% for In-Network, Outpatient and 77.97% and 82.76% for Outpatient Out-of-Network.

While operational outcomes are not determinative of NQTL compliance, and an insurer may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. Consequently, Cigna concludes that the NQTL was applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.

Cigna's methodology for determining which medical/surgical services and which MH/SUD services within a classification of benefits are subject to retrospective review as written and in operation, as well as its retrospective review processes applied to M/S services and for MH/SUD services as written and in operation reflect they are comparable and no more stringent for MH/SUD services within a classification of benefits than for M/S services within the same classification of benefits

# 5. <u>Emergency Services</u>

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)

Organization, will not review claims for excluded Prescription	Organization, will not review claims for excluded Prescription
Drug Products or other services to determine if they are Medically	Drug Products or other services to determine if they are
Necessary, unless required by law.	Medically Necessary, unless required by law.

When Prescription Drug Products that require prior authorization are dispensed at a Pharmacy, you or your prescribing Physician are responsible for obtaining prior authorization from Cigna. If you do not obtain prior authorization from us before the Prescription Drug Product is dispensed by the Pharmacy, you can ask us to consider reimbursement after you pay for and receive the Prescription Drug Product. You will need to pay for the Prescription Drug Product at the Pharmacy prior to submitting a reimbursement request.

When you submit a claim on this basis, you will need to submit a paper claim using the form that appears on the website shown on your ID card.

If a prior authorization request is approved, your Physician will receive confirmation. The authorization will be processed in the claim system to allow you to have coverage for the Prescription Drug Product. The length of the authorization may depend on the diagnosis and the Prescription Drug Product. The authorization will at all times be subject to the plan's terms of coverage for the Prescription Drug Product, which may change from time to time. When your Physician advises you that coverage for the Prescription Drug Product has been approved, you can contact a Pharmacy to fill the covered Prescription Order or Refill.

If the prior authorization request is denied, your Physician and you will be notified that coverage for the Prescription Drug Product is not authorized. If you disagree with a coverage decision, you may appeal that decision in accordance with the provisions of the plan by submitting a written request stating why the Prescription Drug Product should be covered.

and MH/SUD drugs, and, while uniformity in processes is not required by the NQTL requirements (only comparability), and uniformity in processes for designing and applying an NQTL can evidence comparability in the NQTL as-written.

The P&T Committee is composed of voting external clinicians across a number of specialties that perform, among other responsibilities, clinical reviews of drugs to determine whether a drug must be covered on the formulary as a clinical matter. The P&T Committee includes among its voting members a psychiatrist to help ensure that, like other medical specialties, appropriate expertise in MH/SUD treatment is represented when reviewing the clinical safety/efficacy of drugs that may be considered MH/SUD benefits. By including a psychiatrist on the clinical P&T committee, Cigna ensures that comparable clinical expertise in treating MH/SUD conditions and M/S conditions is represented in the formulary decision-making process. While physicians, regardless of specialty, may be able to review the clinical safety/efficacy profile of an MH/SUD drug just as readily as M/S drugs used to treat conditions that the physician may not specialize in treating, Cigna acknowledges the benefits to its formulary management process of including MH/SUD expertise on the clinical P&T Committee. In the context of NQTL compliance, the inclusion of a physician with appropriate MH/SUD treatment expertise on the clinical P&T Committee that assigns clinical designations to M/S and MH/SUD drugs evidences the comparability of the process by which formulary management decisions are made, in writing and in operation, across M/S and MH/SUD prescription drug benefits. Relatedly, it also helps to ensure for MH/SUD drugs the appropriate consideration of the factors and standards that inform Cigna's formulary management decisions.

In rendering clinical findings on drugs, the P&T Committee assesses the FDA labeling and, as appropriate and available, clinical practice standards/trends and documentation like clinical literature and guidelines. The Value Assessment Committee is management practices across M/S and MH/SUD drugs, and, while uniformity in processes is not required by the NQTL requirements (only comparability), and uniformity in processes for designing and applying an NQTL can evidence comparability in the NQTL as-written.

The P&T Committee is composed of voting external clinicians across a number of specialties that perform, among other responsibilities, clinical reviews of drugs to determine whether a drug must be covered on the formulary as a clinical matter. The P&T Committee includes among its voting members a psychiatrist to help ensure that, like other medical specialties, appropriate expertise in MH/SUD treatment is represented when reviewing the clinical safety/efficacy of drugs that may be considered MH/SUD benefits. By including a psychiatrist on the clinical P&T committee, Cigna ensures that comparable clinical expertise in treating MH/SUD conditions and M/S conditions is represented in the formulary decision-making process. While physicians, regardless of specialty, may be able to review the clinical safety/efficacy profile of an MH/SUD drug just as readily as M/S drugs used to treat conditions that the physician may not specialize in treating, Cigna acknowledges the benefits to its formulary management process of including MH/SUD expertise on the clinical P&T Committee. formulary tier.	in deciding whether to place a drug on the formulary and, if so,
Cigna's review evidences that the written processes and standards used to determine formulary placement is not only comparable, but identical, across M/S and MH/SUD drugs. The same P&T and Value Assessment Committee structure reviews M/S and MH/SUD drugs for formulary placement pursuant to common policies and procedures, and the processes and aforementioned factors and evidentiary standards considered in formulary placement does not differ by whether the drug is used to treat a M/S condition or a MH/SUD condition.	on which formulary tier. Cigna's review evidences that the written processes and standards used to determine formulary placement is not only comparable, but identical, across M/S and MH/SUD drugs. The same P&T and Value Assessment Committee structure reviews M/S and MH/SUD drugs for formulary placement pursuant to common policies and procedures, and the processes and aforementioned factors and evidentiary standards considered in formulary placement does not differ by whether the drug is used to treat a M/S condition or a MH/SUD condition.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

Cigna has confirmed that its utilization management programs are applied comparably, and no more stringently, to MH/SUD drugs as compared to M/S drugs. Its written policies governing formulary placement and application of utilization management do not distinguish between the processes, factors or standards that inform design and application of the formulary placement and utilization management NQTLs. Indeed, Cigna uses one, combined policy to govern its formulary management and utilization management requirements across M/S and MH/SUD benefits, and, while uniformity in processes is not required by the NQTL requirements (only comparability), uniformity in processes for designing and applying an NQTL can evidence comparability in the NQTL as-written.

In terms of operational parity compliance, Cigna confirmed that all drugs, whether MH/SUD or M/S drugs, that the P&T Committee designates must be covered are, in fact, covered on the formulary, and all drugs' coverage conform to other P&T Committee clinical

parameters dictating the circumstances under which a drug can be preferred over another drug through tier placement or subject to step therapy requirements mandating use of one drug over another for coverage purposes. Moreover, Cigna's coverage of MH/SUD and M/S drugs all conform to the aforementioned standards established for Tier 1, Tier 2, Tier 3, and, as applicable for policyholders that elect to offer a specialty drug tier, Tier 4 placement status, and drugs subject to a utilization management requirement, including prior authorization, step therapy, and/or quantity limits, conform to the aforementioned standards established for inclusion in a utilization management program. That is, Cigna does not apply a utilization management requirement to an MH/SUD drug that does not exhibit the factors/standards described in the preceding columns that, as-written, justify application of a utilization management requirement to a drug, and in terms of stringency of application of the NQTL no M/S drugs are omitted from a utilization management requirement if they exhibit the same factors/standards.

While operational outcomes are not determinative of NQTL compliance, and an insurer may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. Consequently, Cigna concludes that the NQTLs of formulary management and utilization management were applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.

Cigna has confirmed that its utilization management programs are applied comparably, and no more stringently, to MH/SUD drugs as compared to M/S drugs. Its written policies governing formulary placement and application of utilization management do not distinguish between the processes, factors or standards that inform design and application of the formulary placement and utilization management NQTLs. Indeed, Cigna uses one, combined policy to govern its formulary management and utilization management requirements across M/S and MH/SUD benefits, and, while uniformity in processes is not required by the NQTL requirements (only comparability), uniformity in processes for designing and applying an NQTL can evidence comparability in the NQTL as-written.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

With respect to parity compliance as-written, the same, and not just comparable, processes, factors, and standards are used to determine formulary placement to an MH/SUD or M/S drug.

With respect to the process by which the NQTL is designed and applied, the same formulary committee structure makes decisions with respect to MH/SUD or M/S drugs the ensures appropriate expertise across MH/SUD and M/S treatment. Two Cigna committees perform different, but interrelated, functions when designing utilization management requirements like quantity limits: the Cigna Pharmacy & Therapeutics Committee ("P&T Committee"); and, the Cigna Value Assessment Committee. Cigna uses one, combined set of policies to govern its formulary management practices across M/S and MH/SUD drugs, and, while uniformity in processes is not required by the NQTL requirements (only comparability), uniformity in processes for designing and applying an NQTL can evidence comparability in the NQTL as-written.

The P&T Committee is composed of voting external clinicians across a number of specialties that perform, among other responsibilities, clinical reviews of drugs to determine whether a drug must be covered on the formulary as a clinical matter. The P&T Committee includes among its voting members a psychiatrist to help ensure that, like other medical specialties, appropriate expertise in MH/SUD treatment is represented when reviewing the clinical safety/efficacy of drugs that may be considered MH/SUD benefits. By including a psychiatrist on the clinical P&T committee, Cigna ensures that comparable clinical expertise in treating MH/SUD conditions and M/S conditions is represented in the formulary decision-making process. While physicians, regardless of specialty, may be able to review the clinical safety/efficacy profile of an MH/SUD drug just as readily as M/S drugs used to treat conditions that the physician may not specialize in treating, Cigna acknowledges the benefits to its formulary management process of including MH/SUD expertise on the clinical P&T Committee. In the context of NQTL compliance, the inclusion of a physician with appropriate MH/SUD treatment expertise on the clinical P&T Committee that assigns clinical designations to M/S and MH/SUD drugs evidences the comparability of the process by which formulary management decisions are made, in writing and in operation, across M/S and MH/SUD prescription drug benefits. Relatedly, it also helps to ensure for MH/SUD drugs the appropriate consideration of the factors and standards that inform Cigna's formulary management decisions. In rendering clinical findings on drugs, the P&T Committee assesses the FDA labeling and, as appropriate and available, clinical practice standards/trends and documentation like clinical literature and guidelines. The Value Assessment Committee is composed of representatives representing several functional areas of the combined company, including, for example, clinicians and representatives from Cigna's finance areas, that have experience with formulary management or PBM/health plan operations, and is responsible for deciding - within the clinical parameters established by the P&T Committee - which drugs will be covered on the formularies offered by Cigna to plans and whether a utilization management requirement will apply to a drug. Cigna's formulary committees collectively consider the factors and evidentiary standards described in the narratives to Steps 2 and 3 in deciding whether to place a drug on the formulary and, if so, on which formulary tier.

Cigna's review evidences that the written processes and standards used to determine formulary placement is not only comparable, but identical, across M/S and MH/SUD drugs. The same P&T and Value Assessment Committee structure reviews M/S and MH/SUD drugs for formulary placement pursuant to common policies and procedures, and the processes and aforementioned factors and evidentiary standards considered in formulary placement does not differ by whether the drug is used to treat a M/S condition or a MH/SUD condition.

In terms of operational parity compliance, the formulary placement of MH/SUD and M/S drugs all conform to the aforementioned evidentiary standards established for Tier 1, Tier 2, and Tier 3.

Moreover, as further evidence of comparability and equivalent stringency in-operation, Cigna has also assessed as follows across its formularies: a comparable percentage of MH/SUD drugs are covered on v. off-formulary as compared to M/S drugs; a lower absolute number of MH/SUD drugs are covered off-formulary as compared to M/S drugs; a comparable, and indeed a lower, percentage of MH/SUD brand drugs are covered on the non-preferred brand tier (Tier 3) relative to the total number of MH/SUD drugs covered on Tiers 1 and 2 of the formulary, as compared to the proportion of M/S drugs covered on Tier 3 relative to the total M/S drugs are placed on Tier 1 and 2 of the formulary. As all generic drugs covered on the formulary are placed on Tier 1 and no brand drugs are placed on Tier 1, whether MH/SUD or M/S benefits, the placement of drugs on Tier 1 of the formulary is deemed to meet the NQTL stringency and comparability requirements for formulary placement. Put differently, there are no differences in placement of covered generic drugs for MH/SUD or M/S drugs, as the evidentiary standard – which was consistently applied to the placement of MH/SUD and M/S drugs on the formulary – for Tier 1 placement is the generic status of a drug.

While operational outcomes are not determinative of NQTL compliance, and a plan may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. Consequently, the NQTL for multi-tiered formulary design was applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.

The application of the same NQTL standard across M/S and MH/SUD benefits demonstrates as written and in operation reflect they are comparable and no more stringent for MH/SUD services within a classification of benefits than for medical/surgical services within the prescription drug classification of benefits.

In summary, the comparative analyses documented in the narratives to Steps 4 and 5, which themselves construe the application of the multi-tiered formulary design NQTL described in Steps 1 through 3, demonstrate the compliance in-writing and in-operation of the quantity limit/prior authorization NQTL. While operational outcomes are not determinative of NQTL compliance, and a plan may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. In this case, there were comparable and, in some cases more advantageous, outcomes for the placement and tiering of MH/SUD drugs as compared to M/S drugs based on the absolute number of, and incidence of, non-formulary v. formulary and, for on-formulary drugs, Tier 2 v. Tier 3 drugs. These comparable outcomes, along with the confirmation that the evidentiary standards and factors were actually applied consistently to MH/SUD drugs as compared to M/S drugs, evidence in-operation compliance in terms of comparability and equivalent stringency.

## 8. Case Management

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)

You, your dependent or an attending Physician can request Case Management services by calling the **toll-free number** shown on your ID card during normal business hours, Monday through Friday. In addition, your employer, a claim office or a utilization review program (see the PAC/CSR section of your certificate) may refer an individual for Case Management.

- The Review Organization assesses each case to determine whether Case Management is appropriate.
- You or your Dependent is contacted by an assigned Case Manager who explains in detail how the program works. Participation in the program is voluntary - no penalty or benefit reduction is imposed if you do not wish to participate in Case Management.
- Following an initial assessment, the Case Manager works with you, your family and Physician to determine the needs of the patient and to identify what alternate treatment programs are available (for example, in-home medical care in lieu of an extended Hospital convalescence). You are not penalized if the alternate treatment program is not followed.
- The Case Manager arranges for alternate treatment services and supplies, as needed (for example, nursing services or a Hospital bed and other Durable Medical Equipment for the home).
- The Case Manager also acts as a liaison between the insurer, the patient, his or her family and Physician as needed (for example, by helping you to understand a complex medical diagnosis or treatment plan).
- Once the alternate treatment program is in place, the Case Manager continues to manage the case to ensure the treatment program remains appropriate to the patient's needs.

Case management services are completely voluntary. Because case management services are not designed to limit the scope of benefit coverage or the duration of treatment, case management services would not be considered a non-quantitative treatment limitation.

D. Identify the methods and analysis used in the development of the limitation(s); and

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
Health plan enrollees are not required to participate in case management services.	Health plan enrollees are not required to participate in case management services.
Case management services are completely voluntary. Because	Case management services are completely voluntary. Because
case management services are not designed to limit the scope of	case management services are not designed to limit the scope of
benefit coverage or the duration of treatment, case management	benefit coverage or the duration of treatment, case management
services would not be considered a non-quantitative treatment	services would not be considered a non-quantitative treatment
limitation.	limitation.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

Participation in case management services is not required, and an enrollee's participation in case management services does not limit the scope or duration of benefits for either MH/SUD or M/S benefits. Consequently, case management does not function as an NQTL under the cited parity requirement. Notwithstanding the inapplicability of the NQTL requirement to Cigna's voluntary case management program, Cigna offers case management services to enrollees with either complex MH/SUD or M/S conditions.

#### 9. Process for Assessment of New Technologies

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
( <b>M/S</b> )	(MH/SUD)

care technologies, supplies, treatments, procedures, drug or Biologic	care technologies, supplies, treatments, procedures, drug or Biologic
therapies or devices that are determined by the utilization review	therapies or devices that are determined by the utilization review
Physician to be:	Physician to be:

- not approved by the U.S. Food and Drug Administration (FDA) or other appropriate regulatory agency to be lawfully marketed;
- not demonstrated, through existing peer-reviewed, evidencebased, scientific literature to be safe and effective for treating or diagnosing the condition or Sickness for which its use is proposed;
- the subject of review or approval by an Institutional Review Board for the proposed use except as provided in the "Clinical Trials" sections of this plan; or
- the subject of an ongoing phase I, II, III or IV clinical trial, except for routine patient care costs related to qualified clinical trials as provided in the "Clinical Trials" sections of this plan.

In determining whether drug or Biologic therapies are experimental, investigational and unproven, the utilization review Physician may review, without limitation, U.S. Food and Drug Administration-approved labeling, the standard medical reference compendia and peer-reviewed, evidence-based scientific literature.

The plan or policy shall not deny coverage for a drug or Biologic therapy as experimental, investigational and unproven if the drug or Biologic therapy is otherwise approved by the FDA to be lawfully marketed, has not been contraindicated by the FDA for the use for which the drug or Biologic has been prescribed, and is being offered in a clinical trial approved by one of the following:

- the national institutes of health (NIH);
- an NIH cooperative group or an NIH center;
- the FDA in the form of an investigational new drug application;
- the federal department of veterans affairs; or
- an institutional review board of an institution in the state that has a multiple project assurance contract approved by the office of protection from research risks of the NIH.

- not approved by the U.S. Food and Drug Administration (FDA) or other appropriate regulatory agency to be lawfully marketed;
- not demonstrated, through existing peer-reviewed, evidencebased, scientific literature to be safe and effective for treating or diagnosing the condition or Sickness for which its use is proposed;
- the subject of review or approval by an Institutional Review Board for the proposed use except as provided in the "Clinical Trials" sections of this plan; or
- the subject of an ongoing phase I, II, III or IV clinical trial, except for routine patient care costs related to qualified clinical trials as provided in the "Clinical Trials" sections of this plan.

In determining whether drug or Biologic therapies are experimental, investigational and unproven, the utilization review Physician may review, without limitation, U.S. Food and Drug Administration-approved labeling, the standard medical reference compendia and peer-reviewed, evidence-based scientific literature.

The plan or policy shall not deny coverage for a drug or Biologic therapy as experimental, investigational and unproven if the drug or Biologic therapy is otherwise approved by the FDA to be lawfully marketed, has not been contraindicated by the FDA for the use for which the drug or Biologic has been prescribed, and is being offered in a clinical trial approved by one of the following:

- the national institutes of health (NIH);
- an NIH cooperative group or an NIH center;
- the FDA in the form of an investigational new drug application;
- the federal department of veterans affairs; or
- an institutional review board of an institution in the state that has a multiple project assurance contract approved by the office of protection from research risks of the NIH.

B. Identify the factors used in the development of the limitation(s);

Medical/Surgical Benefits (M/S)	Mental Health/Substance Use Disorder Benefits (MH/SUD)
Cigna considers the following factors in determining whether a services is experimental, investigational or unproven:	Cigna considers the following factors in determining whether a services is experimental, investigational or unproven:
• inadequate volume of existing peer-reviewed, evidence-based, scientific literature to establish whether or not a technology, supplies, treatments, procedures, or devices is safe and effective for treating or diagnosing the condition or sickness for which its use is proposed;	• inadequate volume of existing peer-reviewed, evidence-based, scientific literature to establish whether or not a technology, supplies, treatments, procedures, or devices is safe and effective for treating or diagnosing the condition or sickness for which its use is proposed;
• when subject to U.S. Food and Drug Administration (FDA) or other appropriate regulatory agency review, not approved to be lawfully marketed for the proposed use;	• when subject to U.S. Food and Drug Administration (FDA) or other appropriate regulatory agency review, not approved to be lawfully marketed for the proposed use;
• the subject of review or approval by an Institutional Review Board for the proposed use except as provided in the in a clinical trial	• the subject of review or approval by an Institutional Review Board for the proposed use except as provided in the in a clinical trial
• the subject of an ongoing phase I, II or III clinical trial, except for routine patient care costs related to qualified clinical trials as provided in the clinical trials section below.	• the subject of an ongoing phase I, II or III clinical trial, except for routine patient care costs related to qualified clinical trials as provided in the clinical trials section below.

C. Identify the sources (including any processes, strategies, or evidentiary standards) used to evaluate the factors identified above;

Medical/Surgical Benefits (M/S)	Mental Health/Substance Use Disorder Benefits (MH/SUD)
<ul> <li>In approving new technology, MTAC uses principles of evidence-based medicine in its evaluation of the following sources:</li> <li>clinical literature</li> <li>FDA approval or clearance, as appropriate, is necessary, but not sufficient, for Cigna to consider a technology to be proven.</li> <li>FDA approval or clearance</li> <li>English language peer reviewed publications including documents prepared by specialty societies and evidence-based review centers, such as the Agency for Health Care Research</li> </ul>	<ul> <li>In approving new technology, MTAC uses principles of evidence-based medicine in its evaluation of the following sources:</li> <li>clinical literature</li> <li>FDA approval or clearance, as appropriate, is necessary, but not sufficient, for Cigna to consider a technology to be proven.</li> <li>FDA approval or clearance</li> <li>English language peer reviewed publications including documents prepared by specialty societies and evidence-based review centers, such as the Agency for Health Care Research</li> </ul>
and Quality.	and Quality.

D. Identify the methods and analysis used in the development of the limitation(s); and

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)

subject matter issue. The information is reviewed as part of the	subject matter issue. The information is reviewed as part of the
annual update process.	annual update process.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

The definition of experimental/investigational /unproven services is the same for MS and MH/SUD. A single review committee, Cigna's MTAC evaluates all new technologies for M/S and MH/SUD benefits.

Cigna's methodology and processes for determining whether M/S interventions and MH/SUD interventions within a classification of benefits are experimental, investigational and/or unproven are comparable and no more stringent for MH/SUD services within a classification of benefits than for M/S services within the same classification of benefits as written and in operation.

Cigna collects, tracks and trends relevant metrics on a semi-annual basis for services within each classification of medical/surgical and MH/SUD benefits. Metrics may include initial EIU coverage denials, coverage denials upheld and overturned upon internal appeal and coverage denials upheld and overturned upon external appeal/review.

An "in operation" review of claims data from a sampling of Cigna-administered plans revealed no excessive denial rates for MH/SUD claims denied as experimental, investigational and unproven as compared to medical/surgical claims denied as experimental, investigational and unproven. An "in operation" review of Cigna's application of the Experimental, Investigational, and Unproven NQTL, specifically approvals and denial information, in the "All Other Outpatient, Out-of-Network, Services" classification revealed no statistically significant discrepancies in EIU denial rates as-between MH/SUD and M/S benefits.

While operational outcomes are not determinative of NQTL compliance, and an insurer may comply with the NQTL requirement notwithstanding a disparate outcome for an NQTL applied to MH/SUD benefits as compared to M/S benefits, comparable outcomes can help evidence compliance with the in-operation component of the NQTL requirement. Consequently, Cigna concludes that the NQTL was applied comparably and no more stringently to MH/SUD benefits than to M/S benefits.

The application of the same NQTL standard across M/S and MH/SUD benefits demonstrates as written and in operation reflect they are comparable and no more stringent for MH/SUD services within a classification of benefits than for medical/surgical services within the same classification of benefits.

The use of MTAC for development of evidence based Coverage Policies for M/S and MH/SUD demonstrates as written and in operation reflect they are comparable and no more stringent for MH/SUD services.

# 10. Standards for Provider Credentialing and Contracting

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
Cigna maintains an open network for M/S providers such that new providers looking to contract with Cigna will be admitted if they meet Cigna's network admission criteria.	Cigna maintains an open network for MH/SUD providers, such that new providers looking to contract with Cigna will be admitted if they meet Cigna's network admission criteria.
When determining whether to admit a provider into its provider	When determining whether to admit a provider into its provider
network, Cigna takes into consideration an array of factors	network, Cigna takes into consideration an array of factors

they work for. If certifications are available for paraprofessionals,	they work for. If certifications are available for paraprofessionals,
it is reviewed for credentialing purposes.	it is reviewed for credentialing purposes.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

Cigna does not distinguish between M/S and MH/SUD for purposes of credentialing unlicensed professionals and paraprofessionals. For M/S and MH/SUD, unlicensed providers may not be directly contracted or credentialed but may render services under a fully contracted and credentialed individual (supervising provider) or entity (clinic or facility)

Cigna's credentialing standards for unlicensed professionals and paraprofessionals follows applicable NCQA, CMS and state and federal requirements and guidelines for MS and MH/SUD providers. The credentialing application process is consistent between M/S and MH/SUD and such required licensing, experience, CAQH application and verifications are distinguishable only by differences in regulatory requirements. No additional Cigna-specific credentialing requirements are applied to either M/S or MH/SUD providers.

Consistency in standards and process evidences compliance with the NQTL requirement.

#### 11. Exclusions for Failure to Complete a Course of Treatment

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
( <b>M/S</b> )	(MH/SUD)
Cigna does not exclude benefits for failure to complete treatment.	Cigna does not exclude benefits for failure to complete treatment.

B. Identify the factors used in the development of the limitation(s);

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
Cigna does not exclude benefits for failure to complete treatment.	Cigna does not exclude benefits for failure to complete treatment.

C. Identify the sources (including any processes, strategies, or evidentiary standards) used to evaluate the factors identified above;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
Cigna does not exclude benefits for failure to complete treatment.	Cigna does not exclude benefits for failure to complete treatment.

D. Identify the methods and analysis used in the development of the limitation(s); and

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
Cigna does not exclude benefits for failure to complete treatment.	Cigna does not exclude benefits for failure to complete treatment.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

Cigna does not exclude benefits for failure to complete treatment for M/S or MH/SUD Benefits. Cigna's process is consistent between M/S and MH/SUD, so Cigna does not apply such an NQTL to MH/SUD benefits that warrants analysis under the NQTL requirement.

### 12. <u>Restrictions that Limit Duration or Scope of Benefits for Services</u>

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
Cigna has a National Network that includes providers within the	Cigna has a National Network that includes providers within the
United States. Cigna's policies do not cover anything other than	United States. Cigna's policies do not cover anything other than
urgent or emergent services if rendered outside of the United	urgent or emergent services if rendered outside of the United
States.	States.

B. Identify the factors used in the development of the limitation(s);

Medical/Surgical Benefits (M/S)	Mental Health/Substance Use Disorder Benefits (MH/SUD)

D. Identify the methods and analysis used in the development of the limitation(s); and

Medical/Surgical Benefits (M/S)	Mental Health/Substance Use Disorder Benefits (MH/SUD)
Cigna has a National Network that includes providers within the	Cigna has a National Network that includes providers within the
United States. Cigna's policies do not cover anything other than	United States. Cigna's policies do not cover anything other than

urgent or emergent services if rendered outside of the United	urgent or emergent services if rendered outside of the United
States.	States.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

Cigna's geographic limitations on coverage for services apply uniformly across MH/SUD and M/S benefits.

#### 13. <u>Restrictions for Provider Specialty</u>

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
( <b>M/S</b> )	(MH/SUD)
Providers are required to work within the scope of their licenses.	Providers are required to work within the scope of their licenses.

#### B. Identify the factors used in the development of the limitation(s);

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
Providers are required to work within the scope of their licenses.	Providers are required to work within the scope of their licenses.

C. Identify the sources (including any processes, strategies, or evidentiary standards) used to evaluate the factors identified above;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
( <b>M/S</b> )	(MH/SUD)
Providers are required to work within the scope of their licenses.	Providers are required to work within the scope of their licenses.

D. Identify the methods and analysis used in the development of the limitation(s); and

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
Providers are required to work within the scope of their licenses.	Providers are required to work within the scope of their licenses.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

Cigna requires providers to work within the scope of their licenses for both M/S and MH/SUD benefits. The process is consistent between M/S and MH/SUD benefits. Cigna does not, in writing or in operation, further restrict provision of MH/SUD benefits to certain types of specialties so long as the rendering provider is acting within the scope of the provider's license, and, in terms of stringency, Cigna confirms that it does not waive for any M/S providers the requirement that the M/S provider act within the scope of the provider's license in order for services to be covered.

#### 14. <u>Reimbursement for INN Providers, OON Providers, INN Facilities, OON Facilities (separately)</u>

A. Provide the specific plan language for each NQTL in the above defined category and identify the medical/surgical and mental health and/or substance use disorder benefits to which it applies;

Medical/Surgical Benefits	Mental Health/Substance Use Disorder Benefits
(M/S)	(MH/SUD)
In-Network Providers (Office)	In-Network Providers (Office)
Medical/surgical in-network facility based services are reimbursed	MH/SUD in-network facility based services are reimbursed on a
on an assigned diagnosis-related group (DRG) or case rate basis	per diem basis based upon the competitive rate for the type of
and on a per diem basis.	service (level of care) or procedure with the geographic market.
<b>In-Network Providers (All Other Outpatient Services)</b> Medical/surgical in-network facility based services are reimbursed on an assigned diagnosis-related group (DRG) or case rate basis and on a per diem basis.	<b>In-Network Providers (All Other Outpatient Services)</b> MH/SUD in-network facility based services are reimbursed on a per diem basis based upon the competitive rate for the type of service (level of care) or procedure with the geographic market.
Out-of-Network Providers	Out-of-Network Providers
To calculate appropriate reimbursement levels for covered charges	To calculate appropriate reimbursement levels for covered charges
with out-of-network providers, each of which is often referred to	with out-of-network providers, each of which is often referred to

as the "allowed amount" for a covered service, Cigna first calculates on behalf of the plan sponsor the so-called "Maximum Reimbursable Charge" (MRC) for a covered service in one of several ways, which varies based on the plan sponsor's plan election. The MRC is calculated using one of two methodologies: MRC1 or MRC2. The methodologies, including their evidentiary standards and sources, are set forth immediately below. The MRC for any and all inpatient, outpatient, or emergency services is calculated consistently across MH/SUD and M/S benefits aligned to a classification, as reflected by the written methodology described in the benefit plans, which sets forth a broadly applicable methodology for MRC under the plan that does not distinguish between MH/SUD and M/S benefits rendered on an out-of-network basis.

#### **In-Network Facilities**

Medical/surgical in-network facility based services are reimbursed on an assigned diagnosis-related group (DRG) or case rate basis and on a per diem basis.

### **Out-of-Network Facilities**

To calculate appropriate reimbursement levels for covered charges with out-of-network providers, each of which is often referred to as the "allowed amount" for a covered service, Cigna first calculates on behalf of the plan sponsor the so-called "Maximum Reimbursable Charge" (MRC) for a covered service in one of several ways, which varies based on the plan sponsor's plan election. The MRC is calculated using one of two methodologies: MRC1 or MRC2. The methodologies, including their evidentiary standards and sources, are set forth immediately below. The MRC for any and all inpatient, outpatient, or emergency services is calculated consistently across MH/SUD and M/S benefits aligned to a classification, as reflected by the written methodology described in the benefit plans, which sets forth a broadly applicable methodology for MRC under the plan that does not

that is derived from charges for other for similar services may be used."

For emergency services, under either the MRC1 or MRC2 methodologies, and consistent with the Affordable Care Act, Cigna-administered plans agree to pay to an out-of-network provider the greatest of the following amounts:

- (1) The median amount negotiated with in-network providers for the emergency service;
- (2) The amount for the emergency service calculated using the same method the plan generally uses to determine payments for out-of-network services (such as the usual, customary, and reasonable amount); or
- (3) The amount that would be paid under Medicare for the emergency service (minimum payment standards).

## **In-Network Facilities**

Cigna's in-network provider reimbursement methodology for M/S and MH/SUD providers are based upon the same array of factors including, but not limited to:

- Geographic market (i.e. market rate and payment type for provider type and/or specialty)
- Type of provider (i.e. hospital, clinic and practitioner) and/or specialty
- Supply of provider type and/or specialty
- Network need and/or demand for provider type and/or specialty
- Medicare reimbursement rates
- Training, experience and licensure of provider

## **Out-of-Network Facilities**

Maximum Reimbursable Charge – MRC1

adequacy and current Medicare reimbursement rates. All staff adequacy and current Medicare reimbursement rates. All staff participating in a contract negotiation are trained on internal Cigna policies and procedures, and have access to necessary tools to negotiate and develop appropriate reimbursement rates based on standard methodologies, provider specific reimbursement requests and escalate for justification and approval of any deviations. **Out-of-Network Providers** 

# In addition to calculating an MRC for a covered service, Cigna also identifies whether it has access to an acceptable arrangement with an out-of-network health care provider whereby the out-ofnetwork health care provider has agreed, or ultimately agrees, to accept the rate in question as payment in full for the services rendered to a plan enrollee and, consequently, not charge the

enrollee any amount in excess of the plan cost-sharing for the outof-network services. While the health care provider in this scenario remains out-of-network with the plan, in the event such an indirect rate arrangement is used to assess the allowable charges for the out-of-network service, the enrollee is protected by virtue of the contract between the provider and vendor from potential balance-billing of amounts in excess of the plan's allowable charges. The plan accesses these rate arrangements indirectly through Cigna's contracts with third party vendors, which in turn have contracts with, or enter into claim-specific rate arrangements with, a number of MH/SUD and M/S providers. Where available, these rates – which are derived from either proprietary databases that compile charges from that provider and/or similar providers performing similar services in similar geographies, or claim-specific pricing where such rates are not available – vary by provider type (i.e., facility v. physician practitioner v. non-physician practitioner), service type (i.e., CPT codes), and geography, as the costs of rendering services vary based on these factors. If such an indirect rate arrangement does not exist, cannot be obtained, or is unacceptable, as the case may be, then the reimbursement amount payable for services rendered

participating in a contract negotiation are trained on internal Cigna policies and procedures, and have access to necessary tools to negotiate and develop appropriate reimbursement rates based on standard methodologies, provider specific reimbursement requests and escalate for justification and approval of any deviations.

## **Out-of-Network Providers**

In addition to calculating an MRC for a covered service, Cigna also identifies whether it has access to an acceptable arrangement with an out-of-network health care provider whereby the out-ofnetwork health care provider has agreed, or ultimately agrees, to accept the rate in question as payment in full for the services rendered to a plan enrollee and, consequently, not charge the enrollee any amount in excess of the plan cost-sharing for the outof-network services. While the health care provider in this scenario remains out-of-network with the plan, in the event such an indirect rate arrangement is used to assess the allowable charges for the out-of-network service, the enrollee is protected by virtue of the contract between the provider and vendor from potential balance-billing of amounts in excess of the plan's allowable charges. The plan accesses these rate arrangements indirectly through Cigna's contracts with third party vendors, which in turn have contracts with, or enter into claim-specific rate arrangements with, a number of MH/SUD and M/S providers. Where available, these rates – which are derived from either proprietary databases that compile charges from that provider and/or similar providers performing similar services in similar geographies, or claim-specific pricing where such rates are not available - vary by provider type (i.e., facility v. physician practitioner v. non-physician practitioner), service type (i.e., CPT codes), and geography, as the costs of rendering services vary based on these factors. If such an indirect rate arrangement does not exist, cannot be obtained, or is unacceptable, as the case may be, then the reimbursement amount payable for services rendered

#### **Out-of-Network Providers**

In addition to calculating an MRC for a covered service, Cigna also identifies whether it has access to an acceptable arrangement with an out-of-network health care provider whereby the out-ofnetwork health care provider has agreed, or ultimately agrees, to accept the rate in question as payment in full for the services rendered to a plan enrollee and, consequently, not charge the enrollee any amount in excess of the plan cost-sharing for the outof-network services. While the health care provider in this scenario remains out-of-network with the plan, in the event such an indirect rate arrangement is used to assess the allowable charges for the out-of-network service, the enrollee is protected by virtue of the contract between the provider and vendor from potential balance-billing of amounts in excess of the plan's allowable charges. The plan accesses these rate arrangements indirectly through Cigna's contracts with third party vendors, which in turn have contracts with, or enter into claim-specific rate

In-network facility-based services which are not reimbursed on an assigned diagnosis-related group (DRG) or case rate basis may generally be reimbursed on a per diem or discount basis. MH/SUD in-network facility-based services are only reimbursed on a per diem basis, and do not include DRG or case rate reimbursement. Per diem reimbursement for both M/S and MH/SUD facility-based services are based upon the following factors and accompanying evidentiary standards: (1) geographic market, which may be adjusted based upon Medicare Geographical Practice Cost Index ("GPCI"); (2) type of provider and/or specialty (e.g. physician practitioner v. non-physician practitioner v. facility); (3) supply of provider type and/or specialty; (4) network need and/or demand for provider type and/or specialty; (5) Medicare reimbursement rates for codes with assigned Medicare Relative Value Unit ("RVU"); and (6) Training, experience and licensure of providers billing for professional services under the facility agreement.

#### **Out-of-Network Providers**

In addition to calculating an MRC for a covered service, Cigna also identifies whether it has access to an acceptable arrangement with an out-of-network health care provider whereby the out-ofnetwork health care provider has agreed, or ultimately agrees, to accept the rate in question as payment in full for the services rendered to a plan enrollee and, consequently, not charge the enrollee any amount in excess of the plan cost-sharing for the outof-network services. While the health care provider in this scenario remains out-of-network with the plan, in the event such an indirect rate arrangement is used to assess the allowable charges for the out-of-network service, the enrollee is protected by virtue of the contract between the provider and vendor from potential balance-billing of amounts in excess of the plan's allowable charges. The plan accesses these rate arrangements indirectly through Cigna's contracts with third party vendors, which in turn have contracts with, or enter into claim-specific rate

arrangements with, a number of MH/SUD and M/S providers. Where available, these rates – which are derived from either proprietary databases that compile charges from that provider and/or similar providers performing similar services in similar geographies, or claim-specific pricing where such rates are not available – vary by provider type (i.e., facility v. physician practitioner v. non-physician practitioner), service type (i.e., CPT codes), and geography, as the costs of rendering services vary based on these factors. If such an indirect rate arrangement does not exist, cannot be obtained, or is unacceptable, as the case may be, then the reimbursement amount payable for services rendered by the out-of-network provider is, again, equal to the lesser of (I) the covered billed charges submitted by the provider or (ii) the percentile of the service's MRC set forth in the plan.

In the absence of such an acceptable rate arrangement, and as previously noted, the plan agrees to pay a benefit equal to the lesser of the billed charges or the client-elected Maximum Reimbursable Charge for the covered services, which, as described, above, is calculated based on the Maximum Reimbursable Charge methodology selected by the plan.

## **In-Network Facilities**

Standard reimbursement rates for inpatient and outpatient services for both M/S and MH/SUD providers are set based upon standard fee schedules, which are developed for facilities, physicians and non-physicians by state or region and reflect geographic variations within that state or region. Provider-specific fee schedules are developed based upon the professional or facility's negotiation request or business need, including the satisfaction of network adequacy requirements.

In-network facility-based services which are not reimbursed on an assigned diagnosis-related group (DRG) or case rate basis may generally be reimbursed on a per diem or discount basis.

arrangements with, a number of MH/SUD and M/S providers. Where available, these rates – which are derived from either proprietary databases that compile charges from that provider and/or similar providers performing similar services in similar geographies, or claim-specific pricing where such rates are not available – vary by provider type (i.e., facility v. physician practitioner v. non-physician practitioner), service type (i.e., CPT codes), and geography, as the costs of rendering services vary based on these factors. If such an indirect rate arrangement does not exist, cannot be obtained, or is unacceptable, as the case may be, then the reimbursement amount payable for services rendered by the out-of-network provider is, again, equal to the lesser of (I) the covered billed charges submitted by the provider or (ii) the percentile of the service's MRC set forth in the plan.

In the absence of such an acceptable rate arrangement, and as previously noted, the plan agrees to pay a benefit equal to the lesser of the billed charges or the client-elected Maximum Reimbursable Charge for the covered services, which, as described, above, is calculated based on the Maximum Reimbursable Charge methodology selected by the plan.

## **In-Network Facilities**

Standard reimbursement rates for inpatient and outpatient services for both M/S and MH/SUD providers are set based upon standard fee schedules, which are developed for facilities, physicians and non-physicians by state or region and reflect geographic variations within that state or region. Provider-specific fee schedules are developed based upon the professional or facility's negotiation request or business need, including the satisfaction of network adequacy requirements.

In-network facility-based services which are not reimbursed on an assigned diagnosis-related group (DRG) or case rate basis may generally be reimbursed on a per diem or discount basis.

MH/SUD in-network facility-based services are only reimbursed on a per diem basis, and do not include DRG or case rate reimbursement. Per diem reimbursement for both M/S and MH/SUD facility-based services are based upon the following factors and accompanying evidentiary standards: (1) geographic market, which may be adjusted based upon Medicare Geographical Practice Cost Index ("GPCI"); (2) type of provider and/or specialty (e.g. physician practitioner v. non-physician practitioner v. facility); (3) supply of provider type and/or specialty; (4) network need and/or demand for provider type and/or specialty; (5) Medicare reimbursement rates for codes with assigned Medicare Relative Value Unit ("RVU"); and (6) Training, experience and licensure of providers billing for professional services under the facility agreement.

#### **Out-of-Network Facilities**

In addition to calculating an MRC for a covered service, Cigna also identifies whether it has access to an acceptable arrangement with an out-of-network health care provider whereby the out-ofnetwork health care provider has agreed, or ultimately agrees, to accept the rate in question as payment in full for the services rendered to a plan enrollee and, consequently, not charge the enrollee any amount in excess of the plan cost-sharing for the outof-network services. While the health care provider in this scenario remains out-of-network with the plan, in the event such an indirect rate arrangement is used to assess the allowable charges for the out-of-network service, the enrollee is protected by virtue of the contract between the provider and vendor from potential balance-billing of amounts in excess of the plan's allowable charges. The plan accesses these rate arrangements indirectly through Cigna's contracts with third party vendors, which in turn have contracts with, or enter into claim-specific rate arrangements with, a number of MH/SUD and M/S providers. Where available, these rates – which are derived from either proprietary databases that compile charges from that provider

MH/SUD in-network facility-based services are only reimbursed on a per diem basis, and do not include DRG or case rate reimbursement. Per diem reimbursement for both M/S and MH/SUD facility-based services are based upon the following factors and accompanying evidentiary standards: (1) geographic market, which may be adjusted based upon Medicare Geographical Practice Cost Index ("GPCI"); (2) type of provider and/or specialty (e.g. physician practitioner v. non-physician practitioner v. facility); (3) supply of provider type and/or specialty; (4) network need and/or demand for provider type and/or specialty; (5) Medicare reimbursement rates for codes with assigned Medicare Relative Value Unit ("RVU"); and (6) Training, experience and licensure of providers billing for professional services under the facility agreement.

E. Provide any evidence and documentation to establish that the limitation(s) is applied no more stringently, as written and in operation, to mental health and substance use disorder benefits than to medical and surgical benefits.

## **In-Network Providers (Office)**

Cigna's methodology and process for negotiating in-network provider reimbursements for M/S services and MH/SUD services within a classification of benefits are comparable and no more stringent for MH/SUD services than for M/S services within the same classification of benefits as written.

Cigna also follows a comparable process in determining payment rates for non-physician providers for both M/S and MH/SUD benefits. In this process, variables including market demand, provider specialty and availability and frequency of requests for provider fee increases may result in differentials in reimbursement rates across M/S and MH/SUD provider types.

An 'in operation' review of Cigna's medical/surgical and MH/SUD reimbursement rates from a sampling of Cigna-administered plans and CO plans revealed that M/S providers are reimbursed on average at a higher percentage of Medicare than MH/SUD providers.

While there is a disparate outcome in the in-operational review of Cigna's medical/surgical and MH/SUD reimbursement rates that results from differences in local market dynamics, such outcome does not mean the in-practice NQTL standards are non-comparable or being applied more stringently to MH/SUD benefits. Because in-network provider reimbursement is a factor relevant to NQTL compliance insofar as it impacts accessibility to in-network providers and Cigna's network admissions criteria, itself the relevant NQTL, Cigna emphasizes that the comparable out-of-network utilization over the recent measurement period across MH/SUD and M/S benefits and the achievement of applicable network adequacy requirements for MH/SUD and M/S providers, respectively, evidences that any discrepancies in rates offered to MH/SUD providers is not affecting Cigna's ability to admit a sufficient number of providers.

In terms of operational parity compliance, Cigna has assessed the reimbursement rates paid across its book-of-business by reference to reimbursement data in 2019 and 2020. In its assessment, Cigna identified variances in provider reimbursement rates with a significant number of percentage points between M/S and MH/SUD providers. Specifically, Cigna's M/S and MH/SUD reimbursement rates from Cigna-administered plans revealed that M/S providers are reimbursed on average at a higher percentage of Medicare than MH/SUD providers. Specifically, Cigna reviewed CPT codes 99213 and 99214 for M/S physicians compared to MH/SUD psychiatrists. While the average reimbursement rates for CPT codes 99213 and 99214 reflect a discrepancy between the M/S and MH/SUD reimbursement rates, differences in reimbursement rates alone are not the basis for a parity violation provided they are the outcome of comparable processes, factors, and standards for negotiation of provider reimbursement rates. In this instance, differences in the market factors like a qualitatively higher degree of bargaining power for practitioners affiliated with groups or facilities translate into generally higher reimbursement rates for M/S providers as compared to MH/SUD providers. More specifically, increases above the standard reimbursement of non-physician practitioners at an amount less than 100% of Medicare are based on variables such as the higher incidence of facility/group-affiliation for non-physician practitioners, thus affording them substantially higher bargaining power and, in turn, rates. Moreover, differences in intensity of the service delivery may warrant variations in reimbursement; for example, inpatient MH/SUD treatment is commonly less intensive and thus less costly than M/S hospitalization. It must also be emphasized that discrepancies in bargaining power or competitive market forces (e.g., what a provider generally receives or demands as reimbursement) are not conducive to quantitative assessment in a way that translates to rigid, formulaic standards for establishing rates by provider or provider type. That is, the evidentiary standard for an articulated factor, such as market need, may not be, and need not be, expressed as an elaborate metric or formula(e); rather, and to illustrate the point, the evidentiary standard can be a qualitative factor such as, as is often the case in provider negotiations, an assessment of the amount that the plan or its administrator needs to offer to acquire or retain the provider relative to its ability to do so. To wit, the notable increase in MH/SUD rates over the past two years, which correlates to the increases that Cigna has implemented in new rate negotiations with MH/SUD practitioners is evidenced by the downward trend in percentages of M/S rates as compared to Medicare and an upward trend in MH/SUD reimbursement rates as compared to Medicare over the course of two years. This trend is reflective of the steps Cigna has taken as a result of an internal review of its MH/SUD network demonstrating comparability and representative of comparable network access outcomes between M/S and MH/SUD benefits.

#### **In-Network Providers (All Other Outpatient Services)**

Cigna's methodology and process for negotiating in-network provider reimbursements for M/S services and MH/SUD services within a classification of benefits are comparable and no more stringent for MH/SUD services than for M/S services within the same classification of benefits as written.

Cigna also follows a comparable process in determining payment rates for non-physician providers for both M/S and MH/SUD benefits. In this process, variables including market demand, provider specialty and availability and frequency of requests for provider fee increases may result in differentials in reimbursement rates across M/S and MH/SUD provider types.

An 'in operation" review of Cigna's medical/surgical and MH/SUD reimbursement rates from a sampling of Cigna-administered plans and CO plans revealed that M/S providers are reimbursed on average at a higher percentage of Medicare than MH/SUD providers. While there is a disparate outcome in the in-operational review of Cigna's medical/surgical and MH/SUD reimbursement rates that results from differences in local market dynamics, such outcome does not mean the in-practice NQTL standards are non-comparable or being applied more stringently to MH/SUD benefits. Because in-network provider reimbursement is a factor relevant to NQTL compliance insofar as it impacts accessibility to in-network providers and Cigna's network admissions criteria, itself the relevant NQTL, Cigna emphasizes that the comparable out-of-network utilization over the recent measurement period across MH/SUD and M/S benefits and the achievement of applicable network adequacy requirements for MH/SUD and M/S providers, respectively, evidences that any discrepancies in rates offered to MH/SUD providers is not affecting Cigna's ability to admit a sufficient number of providers.

In terms of operational parity compliance, Cigna has assessed the reimbursement rates paid across its book-of-business by reference to reimbursement data in 2019 and 2020. In its assessment, Cigna identified variances in provider reimbursement rates with a significant number of percentage points between M/S and MH/SUD providers. Specifically, Cigna's M/S and MH/SUD reimbursement rates from Cigna-administered plans revealed that M/S providers are reimbursed on average at a higher percentage of Medicare than MH/SUD providers. Specifically, Cigna reviewed CPT codes 99213 and 99214 for M/S physicians compared to MH/SUD psychiatrists. While the average reimbursement rates for CPT codes 99213 and 99214 reflect a discrepancy between the M/S and MH/SUD reimbursement rates, differences in reimbursement rates alone are not the basis for a parity violation provided they are the outcome of comparable processes, factors, and standards for negotiation of provider reimbursement rates. In this instance, differences in the market factors like a qualitatively higher degree of bargaining power for practitioners affiliated with groups or facilities translate into generally higher reimbursement rates for M/S providers as compared to MH/SUD providers. More specifically, increases above the standard reimbursement of non-physician practitioners at an amount less than 100% of Medicare are based on variables such as the higher incidence of facility/group-affiliation for non-physician practitioners, thus affording them substantially higher bargaining power and, in turn, rates. Moreover, differences in intensity of the service delivery may warrant variations in reimbursement; for example, inpatient MH/SUD treatment is commonly less intensive and thus less costly than M/S hospitalization. It must also be emphasized that discrepancies in bargaining power or competitive market forces (e.g., what a provider generally receives or demands as reimbursement) are not conducive to quantitative assessment in a way that translates to rigid, formulaic standards for establishing rates by provider or provider type. That is, the evidentiary standard for an articulated factor, such as market need, may not be, and need not be, expressed as an elaborate metric or formula(e); rather, and to illustrate the point, the evidentiary standard can be a qualitative factor such as, as is

often the case in provider negotiations, an assessment of the amount that the plan or its administrator needs to offer to acquire or retain the provider relative to its ability to do so. To wit, the notable increase in MH/SUD rates over the past two years, which correlates to the increases that Cigna has implemented in new rate negotiations with MH/SUD practitioners is evidenced by the downward trend in percentages of M/S rates as compared to Medicare and an upward trend in MH/SUD reimbursement rates as compared to Medicare over the course of two years. This trend is reflective of the steps Cigna has taken as a result of an internal review of its MH/SUD network demonstrating comparability and representative of comparable network access outcomes between M/S and MH/SUD benefits.

## **Out-of-Network Providers**

Cigna has assessed the methodology for calculating out-of-network reimbursement amounts, and has concluded that it is designed and applied comparably, and no more stringently, as-written and in-operation across MH/SUD and M/S benefits. Cigna's methodology for determining out-of-network M/S provider reimbursement rates and out-of-network MH/SUD provider reimbursement rates are comparable and applied no more stringently to MH/SUD providers than to M/S providers as-written. As described in the foregoing, the plans establish in their terms one methodology, including the percentile or percentage, if any, applied to the MRC for the service that uniformly applies to MH/SUD and M/S benefits. There are not different methodologies for identifying the charge, or, as applicable, the percentile applied to the charge, used to calculate the amount the plan agrees to reimburse for the service rendered by an out-of-network provider. The charges used to calculate MH/SUD benefits are subject to the same percentile or percentage as applies to M/S benefits (e.g., 80% of the MRC for the service). Likewise, enrollees enjoy the protection from balance-billing afforded by any indirect rate arrangement accessed by the plan, whether the provider with which the plan has an indirect rate arrangement renders MH/SUD services or M/S services to the enrollees. Cigna does not limit application of these out-of-network rate arrangements to M/S services, and the indirect rate arrangements with MH/SUD providers leverage, just like M/S providers and where available, rates obtained by third party vendors and derived from third party databases that compile charges for the same or similar providers in the geographic area. Specifically, across MH/SUD and M/S providers the charges for services differ as-between inpatient and outpatient facilities and among different licensure/training levels, including physician and non-physician practitioners (e.g. MD/PhD v. psychologists), and across geographic areas.

In terms of operational NQTL parity compliance, Cigna assessed the application of the out-of-network reimbursement program across Cigna-administered plans and has confirmed out-of-network reimbursement methodology applied, in operation, comparably to MH/SUD benefits and no more stringently than M/S benefits received out-of-network. Specifically, Cigna-administered plans cover and thus treat as payable as plan benefits the full billed charges submitted by the MH/SUD providers at a comparable and, indeed, a generally higher rate than it pays the full billed charges for M/S providers as measured across inpatient and outpatient services paid for its entire book of business. This means that MH/SUD out-of-network providers receive reimbursement for the full submitted charges at least as often, and in some instances more often, than M/S out-of-network providers.

Cigna has concluded that it pays on average to MH/SUD providers a higher reimbursement amount than M/S providers as measured as a discount off the respective MH/SUD and M/S providers' billed charges, while such an advantageous result for MH/SUD benefits is

not required by the NQTL requirement, it does evidence that the out-of-network reimbursement methodology is actually operating in a manner that ensures enrollees accessing MH/SUD services from out-of-network providers are receiving at least comparable benefits to enrollees accessing M/S services from out-of-network providers. While not dispositive of NQTL compliance, these outcomes, in addition to the description of the foregoing process and standards for calculating out-of-network reimbursement amounts, help evidence that the out-of-network reimbursement methodologies applied under Cigna-administered plans are at least as generous for, and thus comparable and not more stringently applied to, MH/SUD inpatient and outpatient benefits in-writing and in-operation.

## **In-Network Facilities**

Cigna's methodology and process for negotiating in-network provider reimbursements for M/S services and MH/SUD services within a classification of benefits are comparable and no more stringent for MH/SUD services than for M/S services within the same classification of benefits as written.

Cigna also follows a comparable process in determining payment rates for non-physician providers for both M/S and MH/SUD benefits. In this process, variables including market demand, provider specialty and availability and frequency of requests for provider fee increases may result in differentials in reimbursement rates across M/S and MH/SUD provider types.

An 'in operation" review of Cigna's medical/surgical and MH/SUD reimbursement rates from a sampling of Cigna-administered plans and CO plans revealed that M/S providers are reimbursed on average at a higher percentage of Medicare than MH/SUD providers. While there is a disparate outcome in the in-operational review of Cigna's medical/surgical and MH/SUD reimbursement rates that results from differences in local market dynamics, such outcome does not mean the in-practice NQTL standards are non-comparable or being applied more stringently to MH/SUD benefits. Because in-network provider reimbursement is a factor relevant to NQTL compliance insofar as it impacts accessibility to in-network providers and Cigna's network admissions criteria, itself the relevant NQTL, Cigna emphasizes that the comparable out-of-network utilization over the recent measurement period across MH/SUD and M/S benefits and the achievement of applicable network adequacy requirements for MH/SUD and M/S providers, respectively, evidences that any discrepancies in rates offered to MH/SUD providers is not affecting Cigna's ability to admit a sufficient number of providers.

In terms of operational parity compliance, Cigna has assessed the reimbursement rates paid across its book-of-business by reference to reimbursement data in 2019 and 2020. In its assessment, Cigna identified variances in provider reimbursement rates with a significant number of percentage points between M/S and MH/SUD providers. Specifically, Cigna's M/S and MH/SUD reimbursement rates from Cigna-administered plans revealed that M/S providers are reimbursed on average at a higher percentage of Medicare than MH/SUD providers. Specifically, Cigna reviewed CPT codes 99213 and 99214 for M/S physicians compared to MH/SUD psychiatrists. While the average reimbursement rates for CPT codes 99213 and 99214 reflect a discrepancy between the M/S and MH/SUD reimbursement rates alone are not the basis for a parity violation provided they are the outcome of comparable processes, factors, and standards for negotiation of provider reimbursement rates. In this instance, differences in the market factors like a qualitatively higher degree of bargaining power for practitioners affiliated with groups or facilities translate into generally

higher reimbursement rates for M/S providers as compared to MH/SUD providers. More specifically, increases above the standard reimbursement of non-physician practitioners at an amount less than 100% of Medicare are based on variables such as the higher incidence of facility/group-affiliation for non-physician practitioners, thus affording them substantially higher bargaining power and, in turn, rates. Moreover, differences in intensity of the service delivery may warrant variations in reimbursement; for example, inpatient MH/SUD treatment is commonly less intensive and thus less costly than M/S hospitalization. It must also be emphasized that discrepancies in bargaining power or competitive market forces (e.g., what a provider generally receives or demands as reimbursement) are not conducive to quantitative assessment in a way that translates to rigid, formulaic standards for establishing rates by provider or provider type. That is, the evidentiary standard for an articulated factor, such as market need, may not be, and need not be, expressed as an elaborate metric or formula(e); rather, and to illustrate the point, the evidentiary standard can be a qualitative factor such as, as is often the case in provider negotiations, an assessment of the amount that the plan or its administrator needs to offer to acquire or retain the provider relative to its ability to do so. To wit, the notable increase in MH/SUD practitioners is evidenced by the downward trend in percentages of M/S rates as compared to Medicare and an upward trend in MH/SUD reimbursement rates as compared to Medicare over the course of two years. This trend is reflective of the steps Cigna has taken as a result of an internal review of its MH/SUD network demonstrating comparability and representative of comparable network access outcomes between M/S and MH/SUD benefits.

#### **Out-of-Network Facilities**

Cigna has assessed the methodology for calculating out-of-network reimbursement amounts, and has concluded that it is designed and applied comparably, and no more stringently, as-written and in-operation across MH/SUD and M/S benefits. Cigna's methodology for determining out-of-network M/S provider reimbursement rates and out-of-network MH/SUD provider reimbursement rates are comparable and applied no more stringently to MH/SUD providers than to M/S providers as-written. As described in the foregoing, the plans establish in their terms one methodology, including the percentile or percentage, if any, applied to the MRC for the service that uniformly applies to MH/SUD and M/S benefits. There are not different methodologies for identifying the charge, or, as applicable, the percentile applied to the charge, used to calculate the amount the plan agrees to reimburse for the service rendered by an out-of-network provider. The charges used to calculate MH/SUD benefits are subject to the same percentile or percentage as applies to M/S benefits (e.g., 80% of the MRC for the service). Likewise, enrollees enjoy the protection from balance-billing afforded by any indirect rate arrangement accessed by the plan, whether the provider with which the plan has an indirect rate arrangement renders MH/SUD services or M/S services to the enrollees. Cigna does not limit application of these out-of-network rate arrangements to M/S services, and the indirect rate arrangements with MH/SUD providers leverage, just like M/S providers and where available, rates obtained by third party vendors and derived from third party databases that compile charges for the same or similar providers in the geographic area. Specifically, across MH/SUD and M/S providers the charges for services differ as-between inpatient and outpatient facilities and among different licensure/training levels, including physician and non-physician practitioners (e.g. MD/PhD v. psychologists), and across geographic areas.

#### **MHPAEA Summary Form**

In terms of operational NQTL parity compliance, Cigna assessed the application of the out-of-network reimbursement program across Cigna-administered plans and has confirmed out-of-network reimbursement methodology applied, in operation, comparably to MH/SUD benefits and no more stringently than M/S benefits received out-of-network. Specifically, Cigna-administered plans cover and thus treat as payable as plan benefits the full billed charges submitted by the MH/SUD providers at a comparable and, indeed, a generally higher rate than it pays the full billed charges for M/S providers as measured across inpatient and outpatient services paid for its entire book of business. This means that MH/SUD out-of-network providers receive reimbursement for the full submitted charges at least as often, and in some instances more often, than M/S out-of-network providers.

Cigna has concluded that it pays on average to MH/SUD providers a higher reimbursement amount than M/S providers as measured as a discount off the respective MH/SUD and M/S providers' billed charges, while such an advantageous result for MH/SUD benefits is not required by the NQTL requirement, it does evidence that the out-of-network reimbursement methodology is actually operating in a manner that ensures enrollees accessing MH/SUD services from out-of-network providers are receiving at least comparable benefits to enrollees accessing M/S services from out-of-network providers. While not dispositive of NQTL compliance, these outcomes, in addition to the description of the foregoing process and standards for calculating out-of-network reimbursement amounts, help evidence that the out-of-network reimbursement methodologies applied under Cigna-administered plans are at least as generous for, and thus comparable and not more stringently applied to, MH/SUD inpatient and outpatient benefits in-writing and in-operation.
