

Health status change

Dear Patient:

In the event that the status of your health changes between now and the day of your procedure, it is very important that you contact your scheduler at the number listed on your paperwork.

Changes in your health status include:

- A visit to the ER
- A surgery
- Abnormal lab results (blood work) reported to you
- Any recent illness – this can include the flu, a respiratory illness, etc.
- A new medical diagnosis from another physician – this can include, but is not limited to, diabetes, heart disease or other heart problems, kidney disease or other related problems, etc.

When in doubt, it is better to call us. This information will be presented to your endoscopist (doctor performing your procedure) to determine if it is in your best interest to proceed with your scheduled procedure.

If you have any questions, please feel free to contact the office.

Thank you
